INAUGURAL ADDRESS

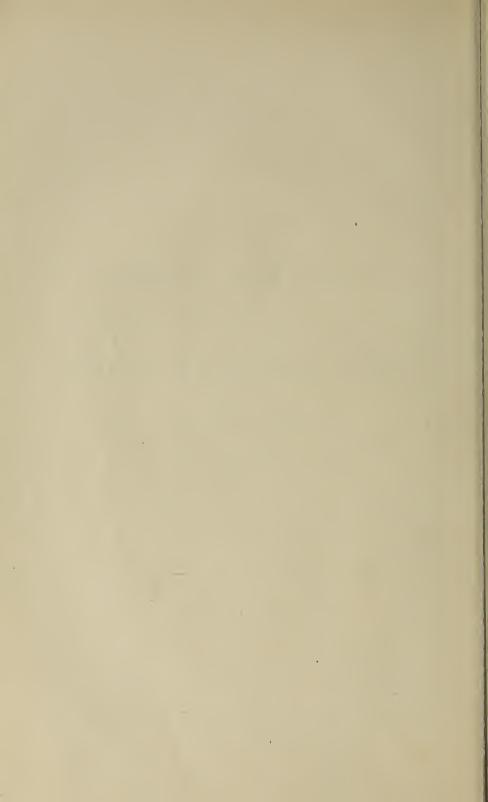

OF

HON. GUSTAVE B. BATES

MAYOR OF QUINCY

MASSACHUSETTS

1916

MAYOR'S INAUGURAL ADDRESS

Gentlemen of the City Council and Citizens of Quincy:

I deeply appreciate the confidence imposed by my fellow citizens in selecting me to be their Mayor for the year 1916, and as a slight return for the honor conferred, I solemnly promise to fulfill the duties of the office to the utmost of my ability. Let me re-affirm the statement which I have heretofore published — I will not exploit, prostitute or neglect the duties of the office of Mayor for personal gain, political

advantage or private profit.

My candidacy for the office of Mayor was mainly based upon the self-evident proposition that every one of our citizens holds an equal interest in the welfare of our municipal government, and is bound in duty and in conscience, in return for the protection it affords him and his estate, to contribute every dollar for which he can legally be assessed to sustain and support such government. But regardless of this rule a system of evasion of taxes, particularly as to intangible property, that is, that which can be secreted from the assessors, has grown to such proportions as to render the taxes, as levied, in a great measure inequitable and unjust, and in violation of the law requiring that there should be a uniform assessment. This not only demoralizes the one who practices such subterfuge and tends to unfit him for good citizenship, but it cheats the taxpayer who loyally pays as he should and naturally arouses in him a feeling that his government is not affording him proper protection as against such moral turpitude.

Believing that it can and must be remedied, I announced as an earnest of what I should undertake to do if elected, that an \$18 tax rate for 1916 should be established; that I would uncover, through the means of reasonable and equitable valuation, over ten million dollars in taxable property not heretofore assessed and relieve the homes from unjust and excessive taxation, and at the same time provide more money for our neglected streets and schools; that I would become a member of the Board of Assessors and aid in stopping class tax dodging, rebating and discriminating in values or favoring

one class as against the other.

These promises I solemnly made and shall undertake to fulfill and I call upon every citizen of the town, whether holding office or not, to aid me in such a cause. I look upon my election, not as a personal tribute, but with the belief that my fellow citizens have reached the point of recognizing that conditions are fast becoming so intolerable a remedy must be found, and have chosen me as the instrument to assist in effecting a cure.

"Taxation without representation drove our fathers led by John Adams, into rebellion. The tax imposed by the British Government

was small and could readily have been paid, but the principle was great and bound to be maintained. The tax rate which has been imposed by this municipality is the outgrowth of unjust discrimination and evasion, which in every sense violates the rule of uniform and fair allotment and demands a revision, calling for independent and fearless action that a remedy may be supplied. This not only involves the personal interest of everyone concerned, but the future welfare of the city itself. Take the present method of raising taxes. I am sure you will agree that it is absolutely unjust and ought to be changed. It can be done with your aid. Let me illustrate by an example that is a constant occurrence. A, for example, by evasion of his taxes or a substantial part thereof, partly owing to the fact that the bulk of his estate consists of intangible property, adds largely to his wealth in twenty years or more. He does this by paying only a small percentage of what he ought to have paid upon his principal. In twenty years there is a saving of forty per cent upon the amount,—and—if we add the interest which he may procure upon this accumulation, it reaches quite fifty per cent. Say that during this period he ought to have paid \$4000 a year and instead paid \$1000, thereby saving \$3000 a year which he put at interest. This in twenty years would amount to about \$75,000 which ought to have been paid into the treasury of the city, but instead he has kept for himself. He has a neighbor, B, having a place we will say costing \$5000. B's estate is taxed for quite as much as it is worth, and so that his neighbor may increase his wealth at B's expense, the latter pays \$4 or \$5 a thousand yearly more than he ought to upon his property, and in the aggregate pays \$20 to \$25 a year more than he should. In twenty years this with interest aggregates \$500 to \$600. Applying this rule throughout the city, we find that the rich Pauls are robbing the poor Peters. I believe by the application of a stringent and proper rule, under which A and B shall be treated alike, instead of the tax rate being \$22 a thousand, it can be reduced to the amount I have specified, that is, \$18.

As is sometimes said, in effect, the people chew the cud of tolerance, seemingly indifferent to what may happen, for a long time, until, aroused to action, they arise in their strength to find the right way and then insist it shall be followed. Let us hope the recent decision of the people, so effectually made, will penetrate into the consciences of those who have heretofore not done their part to such an extent as to produce profitable results to our city.

Let us consider for a moment the interest each of us has in the local government. While the federal and state governments enter but slightly, as a rule, into our daily affairs, and even the county administration is of but comparatively little consequence, a municipal administration organized for our self government deeply affects and continuously controls the life, liberty and pursuit of happiness of its citizens. Existence would, indeed, be intolerable in a community without the aid and protection such a government affords. To keep this up to a high standard, every citizen owes a supreme duty, and if from selfish considerations he fails to do his part, he is, by so much, undermining the society in which he lives, moves and has his being.

That illegitimate methods work disastrous results, and eventually find a cure, is well illustrated by the experience of Quincy as a town from 1844 until it became a city. Colonel Charles Francis Adams in his "Three Episodes of Massachusetts History," speaking of the period from 1844 to 1874, a period of bad government, says:

"As yet the evil had made no great headway, but the sense of offical responsibility and obedience to instructions was already relaxed. Officers were disposed to do what in their eyes seemed about right, regardless of rule, and the town good naturedly condoned offences. Finances fell into confusion. Every year a liberal appropriation would be made to reduce the town debt, but each year saw the debt grow larger. It ran from \$8000 in 1884 to \$112,000 in 1874. * * * It was a pure deficiency debt."

The money raised for such purposes was not applied to it. A reform was instituted in 1874. After that date a responsible government was established. Then, as if by magic, the finances assumed shape. A debt which for nearly half a century had defied every effort to extinguish it then fell from \$112,000, and, after a brief season Mr. Adams states, disappeared entirely. Our well informed auditor modifies this statement somewhat by saying that there was a small debt when the government was transferred to the city.

The causes which led to the demoralization culminating in 1874 were different from those which occasion our burdens today, but the result was the same in effect — a debt constantly increasing and one which, unless a drastic reform be at once instituted, will greatly endanger the borrowing capacity of the city. Upon the other hand, we can and will repeat the reform of 1874, and again the debt may disappear by magic. The financial condition of the city has reached such a point as to justify every effort which can properly be made to

increase the valuation.

The Council, by an order which I understand went into effect in December, 1915, appropriated \$220,000 for the erection of two new schoolhouses. It also appropriated \$3,500 for a new board of health building, this being on a one year loan. This has reduced the borrowing capacity of the city for 1916 to \$264,066, a comparatively small margin to meet expensive contingencies likely to arise during the year. And this condition obtained with a constantly increasing debt, which, owing to the action of the administration of 1915 in reference

to the schoolhouses, etc., has been run up to over \$2,100,000.

This brings us to face with the necessity of seeking every possible remedy that will provide the city with a greater revenue. I have not the slightest doubt but that now the alarm has been sounded our people will respond, and this burdensome debt be met and reduced rather than show a further increase. To this end, you may be assured that every one in interest will be furnished with a blank upon which he can make a full return, under oath, of his taxable property, which will virtually fix the amount of taxes to be imposed. Whether the taxpayer will make a return will be at his option. If for any reason he fails to do so, it will be his own fault and he cannot complain if he is "doomed" to pay what the assessors judge he ought to pay.

I am glad also to note that a constitutional amendment passed at the last state election will be a very important factor in reaching assessable property, and if the legislature, following the bent of public opinion, enacts drastic laws so that all assessable property may be uncovered and open to the inspection of the assessing board, it will be a step in the right direction. I confidently anticipate on this account the evasion that has been practised will become a dead letter,

and every one, willy nilly, be compelled to contribute what he actually owes as a taxpayer. This system of evasion of taxes is, of course, by no means peculiar to Quincy. The fever has become so contagious that that fact in itself would tend to cause a remedy to be sought, of which Quincy of course will have the advantage.

FINANCIAL STATEMENT

The total debt of the city upon December 31, 1914, was \$2,110,-535.64. Bonds matured during 1915 to the amount of \$273,235.64, leaving a balance of \$1,837,300. There were bonds issued in 1915 to the extent of \$112,650, making the debt \$1,949,950. To this amount should be added, as an obligation created during the administration of 1915, orders passed in December, 1915, to build two schoolhouses at a cost of \$22,000, and a board of health building at a cost of \$3,500. thereby making the total amount of the obligation imposed upon the present administration \$2,173,450. From this it appears that the indebtedness, including the obligations just referred to, was increased by the government of 1915 \$62,914.36. During 1916 bonds will mature to the amount of \$264,000, to which must be added \$25,550 of municipal debt, part of a bond issue authorized under date of December 1, 1915, and approved under date of December 13, 1915, making the entire amount of bonds to be paid during this year, 1916, \$289,500. This imposes a burden to be taken care of during the present year somewhat in excess of the amount which is ordinarily imposed and will affect somewhat the appropriation to be raised this year. the payment of said \$289,500 the indebtedness will be reduced from \$2,173,450 to \$1,883,950.

From the statement submitted by the Auditor of the valuation, debt and tax rate for the respective years from 1889 to the present time, and which will be appended to my address, it will be noted that the tax rate, which was \$10.80 per thousand in the first year of the city administration, reached its maximum of \$23.70 in 1913. I further find that since 1910 the debt has exceeded the foregoing calculated indebtedness of 1916. In 1910 the debt was \$1,907,445, the tax rate \$20 and the valuation \$32,456.380. The valuation of 1915 is placed at \$43,608,990, with a tax rate of \$22. With the very substantial increase in such valuation which I confidently believe will occur, and, with the sanction of the Council, holding the appropriations to a conservative amount, I cannot see why the tax rate cannot be reduced to \$18 per thousand, even though the burden of indebtedness to be paid off this year is greater, as I understand, than usual.

GRADE CROSSINGS

The report made by a committee of the Council relative to grade crossings, as well as to other matters concerning bridges and highways affected by the New York, New Haven and Hartford Railroad, treats the difficult subject ably and fully. I should be very glad to co-operate with the Council in securing legislation to remedy the present unfortunate state of affairs. In the confident hope that it will be granted, I shall petition the legislature for remedial legislation in order to have this question properly determined. The questions involved have been so fully discussed that it does not seem necessary to review them. I cannot refrain, however, from urging upon our citizens the necessity of taking every action within their power to

secure a favoring revision of the present condition of affairs in order that the present and future prosperity of our city shall not be disastrously affected.

I shall also be glad to consult with the Council as to taking any steps necessary relative to the Adams street, Wollaston and Atlantic

bridges or to any other property covered by such report.

PASSENGER AND FREIGHT ACCOMMODATIONS

It is not time to take some action as to the changes and improvements necessary for the better accommodation of passengers and freight at the several railroad stations within the city? The city is one of the greatest contributors which the railroad has. Our people have patiently put up with the most limited accommodations and deserve some return, which I apprehend will not be forthcoming unless the railroad is compelled, by public agitation or by taking legal steps, to act. Let me also call attention to the spectacle of the crowded sidewalks and the neighboring stores constantly crowded by passengers waiting for electric cars, justifying any measures compelling the street railway company to furnish a waiting room for its patrons, and not continue longer the present unsatisfactory and troublesome condition.

ADAMS TEMPLE AND SCHOOL FUND

This fund is derived from property provided by the late President John Adams, supplemented by his grandson, the late Charles Francis Adams, and others. Its use was held in abeyance until the Adams Academy was erected upon the historic site of the birthplace of John Hancock. A flourishing school was conducted there for a considerable time, until, largely because the funds were too limited, it was closed several years since. The fund is accumulating but no attempt has been made to reopen the building for educational purposes. During the administration of Mayor Stone he caused the matter to be brought before the Supreme Judicial Court, where it has since been pending. I shall instruct the Solicitor to bring the matter to a determination as soon as it is practicable and have it settled whether the fund shall continue to accumulate or be devoted to educational or such other purposes as the court may decree.

CITY LABORERS

It appears that the city laborers are being paid two dollars per day and have been receiving the same amount for fifteen years. The cost of living, however, has so increased in the last few years that it justifies, as I think, the recommendation that their wages be increased to at least two dollars and fifty cents per day.

CITY CHARTER

Our city charter has been called unique by high authority, and yet those who know its qualities appraise it as being far superior to anything that has been or is now proposed. It embraces the features of the old town meeting and reflects the sentiments of the framers who figured largely in the conduct of town affairs. It was the result of much study, and every meeting when its features were discussed there

was a large attendance of the voters who freely expressed themselves. It was desired to have in this charter a one man executive head, and in no place was there left a loophole through which the chief executive could shift the burden of responsibility. Clothed with the sole power to appoint and remove each and every department head no excuse could be truthfully offered by any past Mayor for the retention in office of incompetent officials. The failures, if there were any, shows not a fault in the valuable document which should be the guide and power, but rather the lack of courage and force in the man who had accepted the confidence and trust of his fellow citizens.

There may be good reasons why some cities desire changes in their charters, as those charters do not safeguard the welfare of the community, but this can never be said of our charter, which was framed by the citizens and has ever zealously been protected and defended

by them.

Our charter stands today without an equal, and the more one studies it the more possibilities one finds in its several sections. Those who have selfish desires to serve find it not to their liking because it prevents them from manipulating the city affairs and thwarting the

will of the people.

I have always believed in a representative government, and the present charter gives us that form in a fair and just degree. The membership of the city council is none too large for a city of over 40,000 population, that is, in round numbers, three members from each ward representing an average population of about 7,000, with five members at large to represent the entire mass. I can readily appreciate that it is much harder for any one man to manipulate a body of twenty-three members than it would be if that same body was composed of but nine members.

Let us keep as close as we can to the principles of the fathers of this great nation, who believed in a government of, for and by the people, and in so doing the city, state and nation need have no fear for the future. It is the promoters of these schemes who are most to be feared as their apparent desire is to take from the people the rights of free government. Probably no city of its size has been freer from dishonest acts than has our city, and our present charter is no doubt in a large measure responsible for this very favorable condition. Let us retain it in its entirety, and better for our city that we devote all our energies and time in carefully guarding and protecting the welfare of our citizens and taxpayers.

OUR QUARRIES

The present state of our quarry industry demands, as to some phases at least, our careful consideration. We may pertinently inquire as to the taxation of the property involved, the use made of our streets for the transportation by this business, the effect of its present condition upon a large portion of our population affected by it, and also the effect upon the one hundred and twenty-five or more granite manufacturers dependent upon the action of the quarry owners for the granite stock which they may desire to use.

for the granite stock which they may desire to use.

Quincy was for many years, as is well known, the leader in this industry and might, I believe, continue to be, to the advantage of its people, if the quarries had been developed so as to command a greater market as they might have been by the employment of more modern and efficient methods, which in the hands of their competitors

have made such a success.

The quarries, now owned or controlled, I understand, by four parties, occupy about six hundred acres, or one-tenth of the entire territory of the town. They are taxed for less than \$10,000. So this large tract of land, comprising one-tenth of the entire area of the city and containing such valuable assets, is, as developed today, paying but about one-hundreth of the city taxes. Instead of having a proper railroad connection to facilitate its operations, our streets are seriously damaged by the use of the antiquated methods employed for transportation. The result is, it is fairly estimated, I believe, that it costs the city to repair the damages caused by such use of its streets double the amount of taxes paid, leaving nothing for the support of our schools and the other departments of our city. The people dependent upon this industry for their livelihood keenly feel the failure to conduct this business upon an extensive and successful scale, while the one hundred and twenty-five or more granite manufacturers in order to fulfill their contracts, are dependent upon the will of the quarry owners, who can fix their own prices and impose such terms as they

may determine upon.

Whatever assistance I, as Mayor, may be able to render in the resuscitation of our once great and prosperous industry will be earnestly contributed, and I hope for the co-operation of our quarry owners and granite manufacturers, the board of trade, our banks, the Council, and all other persons in interest. Among other things, I shall instruct the board of assessors to make a careful investigation, with a view to determining the actual and fair value of this property, employing the same just rule as will be applied to all other property in town. I also advise that a city ordinance be passed that shall virtually regulate the use of our streets in the matter of the transportation of excessive loads of granite over them. The effect of such an ordinance as this would not only be to protect our streets in this respect, but it would serve as an inducement, as I believe, to the establishment of a railroad connecting all quarries on both commons with a dock upon the Neponset river or at any other point commercially advantageous, thus facilitating the proper transportation of the products of this industry as well as protecting our streets. At the present time there are in contemplation four great projects — the extension of the Cape Cod canal, the building of a submarine base for the United States government at Chatham, the construction of the East Boston docks, and the proposed docks upon the Neponset river - any one of which will require more grout than is to be found in all our grout piles. With proper facilities for the transportation of our granite product - by the means of a railroad and waterway - we would be able to dispose of these mountains of waste granite which are today a menace to the future development of that section of our city.

PLANNING BOARD

The legislature, by Chapter 283 of the Acts of 1914, in amendment of a law enacted in 1913 authorizing cities and towns to create planning boards, provided among other things that such boards should make a careful study of the resources, possibilities and needs of such municipalities, particularly with respect to conditions which may be injurious to public health, or otherwise injurious, in and about rented dwellings, and make plans for the development of municipalities with special reference to the proper housing of the people, as well as to make reports to the municipal governments of their doings and recom-

mendations. It is also provided that such boards shall be aided by

the State Homestead Commission created in 1911.

I am advised that as yet no law has been enacted defining what power, if any, a municipal government may, upon the recommendation of such a board, exercise in relation to private rights and interests. And, unless the legislature take such action, no jurisdiction can be exercised over such interests unless the inquiry of the board relates to a public nuisance which is already prohibited by law, or, unless, in the matter of the "housing of the people," following the words of the statute, a city ordinance shall be enacted which reasonably provides for the protection of the public health and safety as to such premises. But this law in relation to public rights is very broad and comprehensive. The board may act in all matters relating to the "resources, possibilities and needs of the municipality." Here there is no limit to the service it can render for the benefit and well being of the municipality.

If our planning board performs its duty with zeal and efficiency, it will greatly contribute to the present and future of the city. We must bear in mind that Quincy within the next thirty years, if it shows the same ratio of growth in that time as it has in the past thirty years, will have a population of over 100,000. And we will have a board with knowledge of our resources, what we can spend and ought to conserve, what public changes should be made for the best interest of the future as well as the present, and what is needed to better

conditions

I have discussed this matter at some length as the law is a novelty in legislation and it may be of some advantage to bring the matter to public attention. I feel confident that by a practical application of this law to the needs of the city this board will constitute one of the most valuable factors in our municipal government.

CITY HALL IMPROVEMNETS

The present City Hall was granted to the town by Daniel French, April 19, 1844, upon condition that "this parcel of land shall not be used for any other purpose than as a place for a town-house for said inhabitants; and upon any breach of this condition, this conveyance

shall be void to all intents and purposes."

The town building was erected in 1862. The town was so small at that time that part of the building was rented for other purposes than the town government. Action was brought claiming that such extraneous use worked a forfeiture of the rights of the town in the promises, but the court held to the contrary. Owing to the changes which have occurred during the past sixty years, a point has been reached where the quarters which can be devoted to the several departments are so cramped and crowded as to apparently necessitate substantial changes and alterations in order that the public business may be properly carried on and the records of the city be properly kept. I suggest, for the consideration of the Council, the question whether some economical changes cannot be made in order to secure greater convenience in use.

COLLETION OF TAXES

In regard to the collection of its taxes the city of Quincy has the poorest record of any municipality in the state. I shall instruct the

tax collector that better results must be obtained during the present year in this department.

ASSESSING DEPARTMENT

This department of our municipal government has for years been noted for its incompetency. The present board has done its part toward burdening the incoming administration. It has, I have been informed, already rebated in excess of its overlay to an amount of more than \$10,000. This means that this amount must be made up by the new administration. This department shall receive my early and most careful consideration.

WATER RATES

The water department has been in a very unsatisfactory condition for many years. The rates are excessive and in spite of such rates this department always ends the year with a deficit. I shall give this matter my careful consideration and promise that there will be a more favorable revision of the rates than was the result of the investigation of the past administration.

STREETS

The antiquated method of transporting our granite product and the opening of our streets by public service corporations has caused our streets to be in a deplorable condition, and until some systematic plan for the building of permanent highways is adopted no real or satisfactory relief can be expected.

OTHER DEPARTMENTS

There are of course many other topics for the administration of the several departments which one might be tempted to discuss, but, so far as I know, they are not of a character that need to be passed upon until reached, at which time it seems to me they can be considered and disposed of, rather than undertake to anticipate them at this time.

Returning again to the economic condition of the city. We must not conclude that the fight has been won as yet because the people have said it must be. We are likely to have arrayed against us opposition of a type which heretofore has largely been in control of the social and financial affairs of the town, as well as of the men who have hidden their resources from the assessors and of those who are fearful of any change in the practises and methods heretofore in vogue. But I am sure we shall win out if we have faith and courage, and, knowing we are right, persevere in our course. We will remember that the field over which the contest may rage is a worthy one. One generation after another has marched across the stage we now occupy, and whenever a call has been made upon their patriotism or manhood, they have never flinched but stood to their guns. We have seen the town grow into a city and in thirty years advance in population from 12,000 to 40,000, and we confidently anticipate that in a like period it will advance to from 100,000 to 125,000.

We hold a sacred obligation, not only to the present, but to the future. This responsibility rests upon every citizen, whether in office or not. We are called upon to see to it that our home government, in which the lives and fortunes of all our people are so closely blended, is sustained and supported by devotion to its service, as well as protected against anything insidious which might impair or destroy its

efficiency.

Park debt	2.000.00
Street debt	7,300.00
Sewer debt	34,000.00 66,500.00
Refunding debt	15,000.00
	\$264,000.00

Debt falling due each month during 1916.

Month	Mun.	Parks	St. Imp.	Water	Sewer	Ref.
Jan.	\$35,200		1			
Feb.	4,000					
Mar.	2,000			10,000	4,000	
Apr.	2,000		800	15,000	12,500	
May	4,500			10,500	9,000	
June	21,400			1,000	1,000	
July	41,300		1,000		2,500	
Aug.	14,800		1,500	21,000	1,000	
Sept.	8,500			2,000	1,000	15,000
Oct.	8,000	2,000		3,000	2,500	,
Nov.	2,500				500	
Dec.	5,000			4,000		
						
	\$139,200	\$2,000	\$7,300	\$66,500	\$34,000	\$15,000
	Total \$2	64.000.00				

To this there must be added \$25,500.00 of Municipal loans coming due in 1916 the bonds for which must be issued during the coming year under the date of December 1, 1915, making the total debt falling due in 1916 \$289,500.00.

I also desire at this time to call attention to another annual obligation of about \$4,500.00 forced upon the taxpayers of the municipality during the dying hours of the outgoing administration; namely, the appointment of four additional permanent men to our police force.

appointment of four additional permanent men to our police force.

It is, therefore, quite evident that every means to hinder and encumber the incoming administration regardless of the expense to our citizens and taxpayers was resorted to in the last weeks of the past administration — which is without precedent in the history of the city.

Auditor's Report

Quincy, Mass., February 1, 1916.

To the City Council, Quincy, Mass.

In accordance with the City Charter, the Auditor of Accounts submits the annual report of his department, showing in detail the expenditures of each department.

Also several statements showing the financial condition of the City at the close of the Financial year, Dec. 31, 1915.

The Treasurer's and Tax Collector's books have been examined and I have found the required vouchers in their respective offices.

HENRY O. FAIRBANKS,

City Auditor.

City of Quincy

IN COUNCIL

ORDERED:

March 15, 1915.

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1915 and ending December 31, 1915, to be expended by and under the direction of the several officers or boards as herein designated, in accordance with the provisions of Chapter 719 of the Acts of 1913.

That the appropriations for Water Maintenance and Clerical be paid from Water Receipts.

That the appropriation for Sewer Maintenance and Clerical be paid from Sewer Assessment Receipts.

BORROWING CAPACITY FOR 1916

Revised Laws, Chapter 27, Section 3.

Sec. 3. A City shall not become indebted in amount exceeding two and one-half per cent on the average of the assessors' valuation of the taxable property therein for the three preceding years, the valuation of each year being first reduced by the amount of all abatements allowed thereon previous to the last day of December in the year preceding said assessment.

Net Valuation 1913 Net Valuation 1914 Net Valuation 1915	\$36,588,919.00 40,181,960.00 43,411,115.00

Respectfully submitted, ERNEST H. BISHOP, Inspector.

Conclusion

The year of 1915 has been a very busy one for the department but without any very serious crimes as the police of many other

Massachusetts cities and towns have encountered.

With a gain of 37 per cent in the number of arrests over the year of 1914 as will be noticed in another column, it is most gratifying to me that this increased demand of work by the department has been accomplished, although seriously handicapped by the long illness of our late beloved and respected Chief of Police, Frank E. Burrell who was most anxious during his long illness for the wellfare of the department.

Since the duties of Acting Chief became mine, I have from the first been most pleased by the united effort on the part of the members of the department to do their best and give to the citizens, the best

service that was in them.

I have no doubt that the citizens have noticed the effort and cooperation shown because of the many words of commendation re-

ceived.

Though my duties have kept me from my usual line of work, there has been no relaxation from the usual vigilance in enforcing the liquor laws, and I am sure our city stands second to none for freedom from vice and the kitchen bar-room.

During the year the interior of the station has been repainted, and with the exception of the general office and Chief's room, it is the

first improvements made since first occupied by the police.

I earnestly hope that attention will be given the need of new quarters for this department, and feel it is not necessary to offer other reasons than these given in the report of the Board of Health.

As well known, this building was taken for its present use when

the department consisted of about fifteen men.

To-day we are badly cramped for room with a department of

about four times larger.

The sleeping quarters of the men are such that it is unfair to ask

them to occupy it longer.

During the year there has been added to the department, a runabout automobile and it has proven its worth in answering many hurried calls and investigations, thereby saving time and expenses of using private automobiles.

I wish at this time to thank most sincerely all officials with whom I have done business with in conducting the affairs of this office, and to His Honor Judge Avery, Associate Judge Cook and Judge Pratt for their very fair treatment and to the other attaches of the court for their willingness to assist and co-operate with the department.

And to the members of the press for fair treatment received in their reports of Police business and fairness in surpressing news when for the best interest of the department in accomplishing results.

Respectfully submitted,
DANIEL R. McKAY,
Chief of Police.

PUBLIC BURIAL PLACES

Quincy, Mass., January 12, 1916.

To His Honor the Mayor of the City of Quincy: -

The managers of Public Burial Places respectfully submit the

following report for the year 1915.

The Board organized with Mr. Thomas Bishop as chairman, and Mr. John Q. Cudworth as clerk. The Board appointed Mr. James Nicol Superintendent of Cemeteries, this making his twenty-first consecutive appointment to this position.

In April Mr. Arthur B. Hultman resigned from the Board, and

Mr. Alexander Russell was appointed to fill the vacancy.

The annual appropriation, ordered by the City Council for the maintenance of Public Burial Places, has been expended under the direction of the Board for necessary equipment, salaries and payrolls, and the grading of a new section to be sold for lots.

The plot graded this year completes that part of Mt. Wollaston Cemetery south of Greenleaf street. The section on the northerly

side is still in an unimproved condition.

The receiving tomb and office building are not suited to the demands of a modern cemetery, and we trust consideration will be given these in the near future.

Hancock Cemetery has been cared for as frequently as possible. The Charles E. French Fund furnishes an income which is used for this purpose.

The City Council passed a special appropriation of \$475.00 to rebuild the wall on the Hancock street side of Hancock Cemetery. We would suggest that a new fence be built around the remaining sides.

The work of rebuilding the wall was not started this year as it was late in the season when the appropriation was passed and the Board considered the work could be done to a better advantage next spring.

The resources, expenditures, and receipts of the department for the year 1915 are as follows: —

Appropriation	\$5,000.00

REPORT OF OVERSEER OF POOR

Quincy, Mass., January 1, 1916.

To His Honor the Mayor of the City of Quincy: -

The Overseer of the Poor, in compliance with the city ordinances respectfully presents her report for the year ending December 31, 1915.

The Department has handled 345 cases this year, of which number 36 cases were aided under Chapter 763, Acts 1913, an Act to Aid Mothers with Dependent Children, which in many cases means almost entire support.

The Associated Charities of Quincy, through its Secretary, has cooperated with the Department in every way possible.

The Employment Bureau established by the Department has been very successful, finding employment for men and women, who, in many cases, would have become public charges. This has been accomplished through the cooperation of the business concerns and corporations in Quincy, as well as through the women of Quincy, who have called upon us to supply domestic help.

I am very grateful to all those who have so willingly cooperated with me in trying to do constructive work in the Department and to assist people applying for aid to help themselves and be independent. This has been my aim during the year in which I have held the office

of Overseer of the Poor.

A detailed report of the cost of the Almshouse and Outside Poor will be found in the following statement.

The following is the financial statement for the year:

Appropriation	\$22,000.00
Balance from 1914	1,176.05
Johnson Fund	80.80
Receipts:	2.93
Water Rates	65.00

REPORT OF CITY PHYSICIAN

Quincy, Mass., January 1, 1916.

To His Honor the Mayor of the City of Quincy: -

I beg to submit the following report of my services as City Physician for the year ending December 31, 1915, in accordance with the city ordinances.

Visits to City Home	92
Visits to Outside Poor	280
Office calls	20
Cases of childbirth	
Visits to Police Station	41
Commitments to Insane Hospitals	
Deaths at City Home	
Deaths Outside Poor	2

Respectfully submitted,

City Physician.

FIRE DEPARTMENT

January 1, 1916.

Hon. Gustave B. Bates, Mayor, Quincy, Massachusetts.

Dear Sir, — I have the honor to submit the annual report of the Quincy Fire Department for the year ending December 31, 1915.

ORGANIZATION

The department consists of one Chief; three Assistant Chiefs; one permanent Captain; one permanent Lieutenant; one permanent Superintendent Fire Alarm; and thirty permanent firemen; also forty-two call men.

Chief — Faxon Billings.

Assistant Chiefs — Frank C. Packard, Louis K. Badger and Albert E. Stephenson.

Captain — Alfred L. Mead.

Lieutenant — John J. Faircloth.

Superintendent Fire Alarm — William A. Gavin. .

Permanent Men — Frank Genero, James Connell, Herbert Griffin, William Carroll, Michael Scully, William Lahey, Richard Williams, Michael Barry, John Desmond, Edward Barry, Murdock McDonald, Myles Creamer, John Deneen, Charles Anderson, Andrew Scully, Daniel McNiece, James Gallagher, Richard Callahan, William Sands, Daniel Radley, William Gerry, James Dillon, Richard Joyce, Henry Hughes, John O'Neil, Charles Litchfield, Edward Lane, Christopher Oliver, Edward O'Neil, Faxon Billings.

APPARATUS

Central Station

One steam fire engine with A & B tractor; one auto combination ladder truck; two auto combination hose trucks; one Chief's car; two spare hose wagons and two pungs.

Wollaston Station

One combination ladder truck, horse drawn. One combination hose wagon, horse drawn.

Atlantic Station

One auto combination hose truck.

West Quincy Station

One ladder truck, horse drawn. One hose wagon, horse drawn.

Ouincy Point Station

One combination hose wagon, horse drawn.

Hough's Neck Station

One combination hose wagon, horse drawn.

Number of feet of hose: 14,600 — of which 3,000 feet are in poor condition.

Horses

There are seventeen horses in the department, some are very old and should be replaced.

Alarms

During the year there have been 505 alarms.

Bell alarms, 153.

Still and telephone alarms, 352.

Out of this number 29 were false alarms.

The Central Station responded to 299 alarms, laid 23,300 feet of hose, raised 1,714 feet of ladders and used 3,005 gallons of chemicals.

The Wollaston Station responded to 120 alarms, laid 6,100 feet of hose, raised 539 feet of ladders and used 844 gallons of chemicals.

of hose, raised 539 feet of ladders and used 844 gallons of chemicals.

The Atlantic Station responded to 152 alarms, laid 10,400 feet of hose, raised 240 feet of ladders and used 1,014 gallons of chemicals.

The West Quincy Station responded to 93 alarms, laid 6,900 feet of hose, raised 640 feet of ladders and used 342 gallons of chemicals.

The Quincy Point Station responded to 79 alarms, laid 11,650 feet of hose, raised 70 feet of ladders and used 852 gallons of chemicals.

The Houghs Nack Station responded to 28 alarms, laid 5,950 feet.

The Houghs Neck Station responded to 28 alarms, laid 5,950 feet

of hose, raised 125 feet of ladders and used 184 gallons of chemicals. Total number feet of hose laid 64,300; ladders raised 3,328 feet

and 6,241 gallons of chemicals used.

PERMITS AND LICENSES

During the past year there have been 1,754 permits and licenses issued from this office as follows:

Garage licenses	185
Gasoline licenses	198
Motor cycle licenses	9
Drivers of oil wagons	44
Keeping paints and oils	7
Transporting explosives	3
Blasting permits	6
Out-of-door fire permits	276
Keeping paints and oils	$\begin{array}{c} 7 \\ 3 \\ 6 \\ 276 \end{array}$

INSPECTIONS

Over 500 inspections have been made during the year of garages, buildings and cellars.

VALUATION, INSURANCE AND LOSSES

Total value of property involved	\$937,294.00 612,404.00		
LOSSES			
January	\$5,764.98		
February	23,911.40 19,985.50		
April	3,773.00		
May June	5,571.25 $2,683.00$		
July	7,715.00		
August September	1,130.00 $1,835.00$		
October	560.00		
November December	3,580.47 $3,529.35$		

RECOMMENDATIONS

Total..... \$80,038.95

I would recommend that the Fire Alarm be rebuilt and cut up, and ten circuit repeaters installed; also that a fire alarm box be placed on each school building. This, I consider a very important matter.

In conclusion, I wish to thank all City Officials, who have in any way helped me in the discharge of my duties the past year, and I also wish to thank the men of the department for their co-operation.

Respectfully submitted,

FAXON BILLINGS, Chief Engineer Fire Department, City of Quincy, Mass.

REPORT OF CITY CLERK

I have the honor to submit the twenty-seventh annual report for this department, being for the year ending December 31, 1915.

RECEIPTS

Licenses

Junk	\$340.00
Amusement

JOHN CURTIS,

Collector of Taxes.

SEALER WEIGHTS AND MEASURES

Quincy, Mass., February 1, 1916.

Hon. Gustave B. Bates, Mayor, City of Quincy.

Sir: — Complying with your request, I beg to submit the following report of the Department of Weights and Measures for the year ending December 31, 1915.

TESTING AND SEALING

During the year just closed the work of this department has increased nearly twenty per cent., due to the number of new stores, shops, etc., and the duties of the Sealer call for the testing and sealing of different weighing and measuring devices in no less than five hundred and fourteen (514) places of business of our merchants and manufacturers, as this report will show.

In order to perform this work it is necessary to carry a number of weights and measures, together with various tools to adjust and seal all kinds of weighing and measuring devices. This requires means of transportation, and expense. In previous years a team has been hired for this work, but the work has increased to such an extent that this means of conveyance is very slow and inconvenient for traveling in a city where the area is so extensive; I would therefore, recommend that the City purchase an automobile for this Department, with the view of efficiency and economy.

TESTING AND REWEIGHING PACKAGES

This line of work has been carried on as recommended by the State Department of last year, and good results have been found. I find the merchants are always willing to co-operate, and I have been received very courteously, even at times when I have found the clerks busy putting up orders, and caused them inconvenience by checking and reweighing same. I intend to continue on this line. not because, in my opinion, the clerks are dishonest, but it tends to make them more careful and accurate in their work, knowing what a violation of short weight means to both clerks and employers.

The number of packages reweighed and found under or over, as the case may be, does not mean there was any great loss to the purchaser or dealer, as the Sealer checks his reweighings, no matter how small or large the weight indicates, when it is not correct.

HAWKERS AND PEDLARS

Section 19 of Chapter 65 of the Revised Laws, transferring the issuance of Hawkers' and Pedlars' Licenses from the Secretary of State to the Commissioner of Weights and Measures, and Section 29 of the same Chapter, defining the duties of the local Sealer, in that line of work, has also added more work to this Department, but at the same time a revenue for the City.

The local ordinance has been amended to conform with the State Laws, thus placing the issuance of licenses of Hawkers and Pedlars to the Sealer of Weights and Measures instead of the Inspector o Meat and Provisions, as heretofore.

INSPECTION OF ICE TEAMS

This work was carried on during the summer months, and in no instance was there a great amount of under or over weight. The ice men were very careful as to the condition of the scales in use, and to have them sealed.

REWEIGHING COAL TEAMS

During the year twenty-five (25) teams were held up in transit, certificates examined, and loads reweighed, amounting to one hundred and nine thousand, four hundred and seventy (109,470) pounds. Ten (10) loads, amounting to forty-one thousand, nine hundred and thirty (43,930) pounds, were found correct; ten (10) loads, amounting to thirty-seven thousand, nine hundred and forty-five (37,945) pounds, were found overweight by three hundred and sixty-five (365) pounds; and five (5) loads, amounting to twenty-nine thousand, five hundred and ninety-five (29,595) pounds, were found short by one hundred and forty-five pounds.

Our City is very fortunate in that it has no so-called "coal pedlars," who go from house to house selling coal by the basket, hundred pound weight, or load, as desired, as these men are generally dishonest, as

has been proven where they operate in this manner.

Included in this report are the receipts and disbursements of the Department for the past year, together with tables showing the work done.

I wish to take this opportunity to thank all with whom I have come in contact during the past year, and trust future relations will continue as pleasant.

Respectfully submitted,

JAMES M. CANTFILL, Sealer of Weights and Measures.

REPORT OF DOCK AND WATER FRONT COMMISSIONER

For The Year 1915

To His Honor the Mayor of the City of Quincy,

I beg to report as follows:

The commerce of the Waterfront of the City of Quincy was approximately three million dollars less than last year, but this is offset by the fact that the Fore River Shipbuilding Corporation had in its Quincy Yard nine million dollars worth of products of the year 1915, finished but not delivered.

The Weymouth Fore River has two appropriations now pending from the United States Government, fifteen thousand and two hundred thousand both recommended by the United States Engineers. The Neponset River has received large appropriations from both the State and the United States Government. The approaches in Dorchester Bay have been materially improved and the River dredged to 15 feet deep and 100 feet wide to the Hancock Street Bridge. The United States Government is now being asked to increase the width of this channel to 200 feet. With the nine million dollar terminal at the entrance to this river and with the three million dollar dock now building the future of the Neponset as a navigable river, available for large commercial development, seems assured and this river in the near future should be a great asset to the City of Quincy.

The State of Massachusetts has appropriated seventy-five thousand dollars for the improvement of our great Water-Highway Weymouth Fore River. Your Commissioner obtained from the Fore River Shipbuilding Corporation a contribution of fifteen thousand dollars for this improvement, contingent upon the appropriation by the City of Quincy of ten thousand dollars and appropriations by the State and United States Government necessary to complete the three hundred thousand dollar project recommended by the United

States Army Engineers.

As your Commissioner, I most emphatically recommend the taking of a location for a public landing on the Neponset River at Squantum. The taking of a location for a public landing on Quincy Bay at or near the Bit so called on the Hough's Neck Road, and more strongly than either of these I recommend the purchase of a location for a public dock. Note the purchase of a location and no more unless the business interests will insure the city a proper income from any expenditures on the building of docks and freight handling apparatus. This will insure the City of Quincy the expenditure of the \$25,000.00 now held by the Port Directors for the improvement of Quincy Town River. By order of His Honor Mayor Campbell, your Commissioner attended a meeting at Dorchester and spoke in favor of a new bridge across the Neponset River. He attended several meetings of the Park Commissioner and all hearings at the State House relating to any matters connected with Quincy's water front.

He assisted Senator L. F. R. Langelier and Representatives Sandberg and Ericson by every means in his power in the legislation which resulted in the State appropriating \$75,000.00 for Weymouth

Fore River.

By order of the Mayor he attended a meeting at Raleigh, N. C., in company with Secretary Daniels of the Navy, Secretary Redfield of Commerce, Secretary Lane of the Department of the Interior, Congressman Moore of Pennsylvania, Congressman Small, of North Carolina and several other Congressmen. He responded to the address of welcome by the Mayor of Raleigh and extended the greetings and good wishes of Mayor Campbell of Quincy. He also represented the City of Quincy at the Atlantic Deeper Waterways Convention at Savannah, Georgia; was one of the speakers at the Convention and spoke of the beautiful and prosperous city of Quincy to 1,500 people. He patrolled the Weymouth Fore River at the launchings of the submarines by order of Secretary Daniels, and attended all hearings at Boston and Washington, D. C., before the United States Engineers.

In conclusion, I beg to report that our water-front is becoming more desirable and prosperous every year and a system of judicious

improvement by the City of Quincy is fully warranted.

Respectfully submitted, FRANK FESSENDEN CRANE, Commissioner

ASSESSORS' REPORT

The polls returned by the assistant assessors and those registered for the year, amounted to 12,252, made up as follows:

	Total
Ward 1	2,266
Ward 2	2,421
Ward 3	2,089
Ward 4	
Ward 5	
Ward 6	

The assistant assessors who served during the year were: Francis M. Curtis, Ward 1; Joseph M. Moriarty, Ward 2; Leo J. McMaster, Ward 3; Louis K. Badger, Ward 4; Robert E. Comins, Ward 5; Percival A. Hall, Ward 6.

Summary from Table of Aggregates Resident property owners..... 7,391 Non-resident property owners....... 2,923 Poll tax only..... 12,252 Number of horses assessed..... 1,026 Number of neat cattle and cows..... 634 Number of dwelling houses Number of acres of land. 7,602 6,664

In closing, the members of the Board of Assessors wish to state that, more work could be done by this department, if all the members of the Board were in daily attendance at the department office. By the present arrangement, the full Board sits for hearings but twice each week, and on these occasions for one half day only.

In consequence, there is not enough time in which to consider all

the matters that come before the Board for adjustment.

The space assigned the assessing department in City Hall as an office does not meet the demands on it. It allows neither the required room for the members of the Board and the clerks of the department, nor the necessary accommodations for the Public. And certain state regulations pertaining to public records cannot be observed on account of lack of necessary space.

These conditions, coupled with the use of a too voluminous and

cumbersome card system, hamper the department in its efforts to do

good and satisfactory work.

Respectfully submitted, JOHN J. O'HARA, CHARLES R. SHÉRMAN, WELLINGTON W. MITCHELL, Assessors of the City of Quincy.

REPORT OF PARK COMMISSIONERS

Quincy, Mass., January 26, 1916.

To His Honor the Mayor,

Dear Sir: - The Board of Park Commissioners respectfully submits the following report, and takes this opportunity to point out that the appropriation for this department has never been sufficient to carry it through the season, nor does it permit improvements most urgently demanded.

We earnestly hope that a more generous appropriation may be

made the coming year.

Merrymount Park

We again urge an appropriation for a topographical survey of this park, and for a plan of development for the guidance of future Park Boards. The annual loss of trees by fires and winter storms is severe, and planting to replace the loss should be begun, but a comprehensive plan of the future development is absolutely required to carry out work of a permanent nature intelligently.

The road between Park Lane and Fenno Street is almost impassible at times, and for the safety of the increasing automobile traffic should

at times, and for the safety of the increasing automobile traffic should

be placed in a better condition.

The demand for a locker building for the athletic teams using the Oval and Upper Field is imperative, and should be provided the

coming season.

The low land above the dam can be easily flooded, and would provide ideal facilities for skating, but some method must be devised to prevent flooding the property on the Southerly side of the Parkway now being constructed.

Faxon Park

Future generations will realize the true value of this gift to the City more than the present, and we sincerely hope will acquire the adjoining property through to the old Wendell quarry. A vision of picturesque secluded paths through this wild territory leads us to hope that another benefactor will make the dream a true one.

Safford Park

Formerly the old Wollaston School lot, this open space is now an attractive feature of this section. The walks, lawns and shrubbery received the usual attention.

Public Bathhouse

This popular institution had another successful season. present facilities are often inadequate, and the women bathers especially are uncomfortably crowded in the dressing rooms provided for The installation of a telephone now provides quick communication with physicians and police in case of emergency.

Supervised Playgrounds

The beneficial results obtained through the introduction of supervised playgrounds are too well known to be enlarged upon. A special appropriation of \$500 enabled us to install apparatus and provide supervision at the Ward Six Playground the past season, and the average daily attendance at the three supervised playgrounds under our direction was over eight hundred.

Over one thou and children attended the annual picnic and the closing exercises at Merrymount Oval, and we wish to thank the Playground Committee of One Hundred for its generous contri-

bution of \$65 to help pay expenses of the Field Day.

The Parents and Teachers Association has requested this department to take charge of the Massachusetts Fields Playground the coming year, and generously offers to present the apparatus installed. We recommend a larger appropriation to enable us to take advantage of this opportunity, and we believe the Wollaston School Playground should be placed under our direction also.

In closing this report we again urge the necessity of a playground in Ward One, and early action to secure land while still available.

Very respectfully,

GEORGE E. PFAFFMANN, Chairman, IRA M. WHITTEMORE, Secretary.

REPORT OF BOARD OF HEALTH

January 1, 1916.

The Board of Health respectfully submit the following report for the year 1915.

REPORT OF INSPECTOR OF MILK

Quincy, Mass., January 1, 1916.

To the Board of Health,

Gentlemen: - I herewith submit my report for the year 1915. Milk has always been a staple article of consumption with all classes. and is among the best and cheapest foods on the market, containing 871/2 per cent water, 4.8 per cent sugar, 3.7 per cent fats, 3.3 per cent casein and .7 per cent ash or mineral matter. Water in milk serves to keep the several food ingredients in a condition of suspension. Milk sugar is readily taken into the system as a source of energy. Milk fats furnish both fat and energy. Casein supplies the body with an easily digestible material for the formation of flesh. The ash or mineral matter in milk serves to build the bony frame-work of the body. Few people realize the great food value of pure milk and a careful study of what it contains will convince the most skeptical, that milk contains all the ingredients that are necessary for the building-up of the human body.

With a few exceptions, there are many dairymen in Quincy, who cannot see the wisdom of absolute cleanliness in their dairies and seem to feel that the health department is placing unnecessary hardships on them in demanding that the barns be whitewashed, well ventilated and proper manure pits constructed, also that the cows

be kept clean, especially their udders.

I have made every effort this year to stamp out all danger of milk becoming contaminated. It is only necessary to call your attention to a case of one of the largest producers of milk in Quincy. In his herd of cows, were some that were giving off streptocci and bacillus coli in such numbers that the physicians in Quincy were reporting cases of septic sore throat and intestinal disorders among young children. The cows in this particular case were put in groups of five and samples of their milk were taken for analysis. In this way, it was possible to pick out the offending animals, which were either destroyed or sold for beef.

As an additional safe-guard, I sincerely believe in pasteurizing. By pasteurizing, I mean heating the milk to 145 degrees and holding germs of typhoid, diphtheria, scarlet fever, septic sore throat and tuberculosis are killed and the high bacterial count is reduced.

The farms of those producing milk in Quincy and in many cases outside of Quincy have been inspected and although some were in very bad shape, great improvement has been made and the producers have shown a willingness to comply with whatever suggestions have been made.

The result of analytical work on samples of milk taken from producers was 4.5 per cent fats, 13.30 per cent solids and 150,000 bacterial per cubic centimeter. The state standard for fats is 3.35 per cent and for solids 12.15 per cent and the local board of health permit 500,000 bacteria per cubic centimeter.

There were 182 stores and 55 dealers licensed to sell milk in Quincy during the year 1915. For list of expenditures and receipts see audi-

tor's report.

Yours respectfully,

DANIEL SCOULER, JR. Inspector of Milk.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

Quincy, Mass., January 1, 1916.

To the Board of Health:

Gentlemen: - Owing to the sudden death of Mr. James F. Allen. I was appointed Meat Inspector by Mayor Campbell to take effect May 1st, 1915.

I hereby submit my report from May 1st to December 1st, 1915.

Number of	Inspections made	321
Number of	Licenses issued	112

Owing to a decision handed down by the attorney-general of this state that fish dealers came under the general heading of provisions dealers I was ordered by the city clerk to refund the fish dealers their license fees, which I did, therefore only 102 license fees were actually collected and turned into the city treasury.

Meats and Vegetables Condemned as Unfit for Food

Respectfully submitted,

WALTER G. FIELD, Inspector of Meats and Provisions.

REPORT OF THE BUILDING INSPECTOR

February 4, 1916.

Hon. Gustave B. Bates, Mayor, Quincy, Mass.

REPORT OF CITY ENGINEER

June 1, 1916.

Hon. Gustave B. Bates, Mayor, Quincy, Mass.

Dear Sir: - I send herewith information relating to Annual Report of the Engineering Department for the year ending December

31, 1915.

This information is usually compiled and forwarded before February 1st of the fiscal year, but this year the retiring City Engineer did not make out his report and did not call my attention to it, so that May 3, 1916 was the first information I had that the report was missing.

I am very sorry that this delay occured and hope that it has not

embarrassed you in sending the report to the printer.

To His Honor, the Mayor of the City of Quincy: -

Yours respectfully,
P. F. O'BRIEN, City Engineer.

Quincy, Mass.

ENGINEERING DEPARTMENT

The sixteenth annual report of the Engineering Department for

Appropriation. \$2,500.00 Balance of 1914. \$3.88 Expended Pay Rolls. \$1,991.63 Supplies. \$337.86 Miscellaneous. \$171.10 Balance, December 31, 1915. \$3.59 The following is a statement of the work done by this department during the year. Street Widenings

Howard Ave. Easterly side Howard Ave. to end. School Street was widened at the intersection of Hancock Street.

Commissioner of Public Works

Lines and grades have been given for construction work as requested by the Commissioner.

All new streets built during the year have been laid out by this department. Lines and grades have been given for the widening of

Hancock Street from Granite Street to School Street.

Plans and specifications have been prepared and grades given for the construction of a sea-wall at Houghs Neck, opposite the end of Bell Street. This wall is three hundred and forty-eight feet long and contains four hundred and thirty-eight cubic yards of granite masonry.

Paved Streets

6065 square yards of granite block paving have been laid on Hancock Street widening between School and Granite Streets, a distance of 1650 feet, 400 yards of old paving have been laid on Adams Street between Hancock Street and Alleyne Street, a distance of 600 feet.

SURFACE DRAINS

Grades have been given and record plans have been made of drains for surface water as follows: —

Sewer Department

Lines and grades have been given for the construction of 2.08 miles of sewers laid during the year. Assessment and record plans for this work have been made and filed with the sewer department. There are on file at present 585 sewer assessment and record plans.

Mt. Wollaston Cemetery

Grades have been given for regrading portions of the Mt. Wollaston Cemetery as requested by the Superintendent. A portion of the land purchased in 1913 for the enlargement of the cemetery has been regraded and divided into burial lots.

Building Inspector

This department has checked sizes of members in proposed buildings and foundations as requested by Inspector of Buildings.

City Solicitor

Surveys and plans have been made for accident cases and claims filed against the City as requested by the City Solicitor or Chief of Police. The City Engineer has attended court sessions and legislative hearings when necessary.

Assessors

The assessors plans have been corrected to agree with about 2000 transfers of property made during the year. 750 new buildings have been measured and plotted.

House Numbering

House numbers have been assigned to new buildings when located.

REPORT OF BOARD OF SURVEY

To His Honor the Mayor, and Members of the City Council,

Gentlemen: — The Board of Survey respectfully presents herewith the First Annual Report for the year ending December 31st, 1915.

This Board was appointed in accordance with the provisions of Chapter 704 of the Acts of the Year 1914, and organized on February 6th, 1915, with Mr. Charles L. Gilliatt as Chairman, and City Engineer Ezekiel C. Sargent as Clerk.

An appropriation of \$300.00 was included in the Annual Budget to meet the expenses of the Board. The appropriation has been

expended as follows:

Appropriation		\$300.00
Stationery, advertising and printing	\$123.05	
Pay roll	174.00	
Balance	2.95	
	\$300.00	\$300.00

The Board has held numerous meetings throughout the year, and has approved the lay-out of the following streets:

Cushing St. from Beal St. to Woodbine St. Chapman St. from Beale St. to Woodbine St.

Clay St. extension from Webster St. to Chapman St.

Cliveden St. from Hancock St. westerly a distance of about 209

Piermont St. from Granger St. to Sherman St.

Acton St. from Norfolk St. to North Central Avenue.

Everett St. from Elmwood Ave., to Sherman St. Exeter St. from Harvard St. to North Central Avenue. Sherman St. from Milton St. to North Central Avenue. Harvard St. from Sherman St. about 92 feet southerly.

Pine St. from the northerly end of the present street to Sherman St. Norfolk St. from the northerly end of the present street to Sherman

Milton St. from Beale St. to land of O. R. Beale. Albany St. from Granger St. to Chatham St. Chatham St. from Milton St. to Piermont St. Granger St. from Milton St. to Harvard St. Washington St. from Milton Line to Milton St.

Edgewood Circle from Woodward Ave. a distance of about 485

feet easterly.

Forbush Ave. from Palmer St. to Chesley Place.

Grossman St. from Water St. to land of the heirs of Jeremiah Nightingale.

Clifton St. from Merrymount Rd. a distance of about 240 feet

southerly. Williams Court, from Grossman St. westerly.

The plans of above streets have been signed and filed in the office of the City Engineer.

Respectfully submitted,

CHARLES L. GILLIATT, WALTER E. PIPER, PERRY LAWTON.

FIRST ANNUAL REPORT OF THE PLANNING BOARD OF THE CITY OF QUINCY

To His Honor the Mayor and Members of the City Council.

Gentlemen: - The Planning Board respectfully presents here-

with its first annual report for the year ending December 31st, 1915.

The Planning Board was appointed on January 18th, 1915, in accordance with the provision of Chapter 494 of the Acts of the

Legislature for the year 1913, which act provides in part as follows:

Section 1. "Every City of the Commonwealth and every town having a population of more than ten thousand at the last preceding national or state census, is hereby authorized and directed to create a board to be known as the planning board whose duty it shall be to make careful studies of the resources, possibilities and needs of the city or town, particularly with respect to conditions which may be injurious to the public health, or otherwise injurious in and about rented dwellings, and to make plans for the development of the municipality with special reference to the proper housing of its people.

Sec. 4. Provides that "The city council or other governing body in cities is authorized to make suitable ordinances, and towns are authorized to make suitable by-laws for carrying out the purposes

of this Act, and they may appropriate money therefor.

The City Council on March 15, 1915, passed "An ordinance relative to the creation of a Planning Board for the City of Quincy" which ordinance was approved by His Honor the Mayor on March 17, 1915, and provides that the Planning Board shall consist of five members who shall hold office as follows: One for a term of one year, one for a term of two years, one for a term of three years, one for a term of four years and one for a term of five years from the first Monday in February, 1915, and beginning with the year 1916 the Mayor shall in the month of January appoint, subject to confirmation by the City Council, one member of said board who shall hold office for five years from the first Monday in February following. An appropriation of \$250.00 was included in the annual budget to meet the expenses of the board.

The Planning Board organized on February 6, 1915, with Mr. Charles W. Bailey, Chairman, and City Engineer Ezekiel C. Sargent, Clerk, and have held 20 meetings during the year. Through the courtesy of his Honor the Mayor, the meetings have been held in the

Mayor's office at City Hall.

The subject of City Planning, while not new to many persons who have made a study of the development of European cities, is certainly new in its application to New England communities where villages have grown to towns, and towns to cities without any particular regard for their future needs or requirements, and where large sums of money are continually expended to correct conditions which might have been remedied a few years before at small expense, or could not have existed at all if development had been guided along the lines of a comprehensive plan.

The Massachusetts planning board act was passed for the express purpose of creating a board in each community to carefully study these conditions, that improvements might be made consistent with developments, that the community's resources shall be conserved.

The powers of Planning Boards are purely advisory and the results of their investigations can only be of value through the adoption of

their recommendations by the governing body.

The Quincy Planning Board has devoted much of its time in investigating existing conditions in our city, and in the collection of data, and while the board has not, as yet, undertaken the preparation of a city plan; they have, however, considered many problems which appear to be of importance, and in need of immediate attention.

Population

The board has prepared a chart showing the estimated future population of the city as based upon the records of population for the past fifty years. The estimates, we believe are conservative, but indicate approximately the probable increase for the next twenty years.

$1935\ldots$		

Highways

One of the most essential requirements of any city is a proper arrangement of its street system, with principal highways of sufficient width to provide for the continually increasing traffic of a growing community.

The City of Quincy is so situated that the greater part of the traffic of the south shore towns must pass through its centre in its

course to and from the City of Boston.

Washington Street, Adams Street, Hancock Street, Quincy Avenue, School Street, Franklin Street and Independence Avenue are highways which at present accommodate this travel passing through Quincy Centre; while Willard Street in West Quincy bears the heavy through traffic in the westerly portion of the City.

The City has, during the past few years, widened that portion of Hancock Street from Adams Street to Washington Street to a width of 80 feet, and from Granite Street to School Street to a width of 65 feet, so that this highway through its entire length is not less than

64 feet in width.

Washington Street from City Square to Chubbuck Street, a distance of about one and one-half miles is at present but $49\frac{1}{2}$ feet in width, while from Chubbuck Street to the Weymouth Fore River Bridge it is 66 feet in width. To widen this street at the present time to uniform width of 66 feet, would necessitate the immediate expendi-

ture of a large amount of money, which the city in its present financial condition can ill afford. Yet it is evident to all familiar with the present conditions that this street must be widened in the future. The Planning Board, therefore, recommends that a building line be established on this street, in accordance with the plans herewith submitted, that the line for future widening may be defined and the city

saved during the next few years.

This method of procedure, as recommended by the Planning Board, has already been adopted by the present city government on School Street between Hancock Street and Franklin Street, where building lines have been established under the authority of Section 103 of Chapter 48 of the Revised Laws, which statue makes it possible for the city to establish a building line and to provide that existing buildings may remain, thereby eliminating a large part of the expense for immediate damage.

The Planning Board believes that similar action should be taken on other streets in the city: Adams Street from Hancock Street to Newport Avenue is entirely too narrow for present requirements, and building lines could be established on this portion of the street without disturbing any of the existing buildings, thereby insuring the con-

struction of a 60 foot street in the future at a minimum cost.

Franklin Street between School Street and Independence Avenue should be protected in the same manner, by establishing building lines on this portion of the street at least 60 feet apart. East and West Squantum Streets for a considerable portion of the distance between Farrington Street and Atlantic Street is but 33 feet in width. This street is one of the oldest in the city, and is the only connecting highway between Milton and the northerly portion of the city. The Planning Board is of the opinion that this street should be at least 50 feet in width and that a building line should be established on this portion of the street, and respectfully submits herewith for your consideration, a tentative plan for this work.

Dead End Streets

There are in Quincy, as in many other cities where land development has been unrestricted, many dead end streets, and while it is to be hoped that the Board of Survey will discourage this practice in the future, the Planning Board is of the opinion that many of those now existing could be extended without the removal of buildings, and should receive the immediate attention of the City Council.

The extension of Vassal Street to Oxenbridge Road, Norfolk Downs, is one which is now before the city council, and in the opinion

of the Planning Board should be undertaken at once.

Quincy City Square

City Square, by reason of its location at the intersection of two of the principal through highways of the city, and its proximity to the railroad station has become the terminal and transfer point for the street railway lines radiating to the various sections of the city and

the surrounding towns.

The amount of traffic and automobile travel through this square, particularly on Sundays and holidays, under the present arrangement results in serious congestion. The Planning Board is of the opinion that these conditions will never be materially improved until the square ceases to be used as a car barn and cars allowed to stand

The Board believes that action should be in the public streets. taken by the city government to relieve, if possible, this congestion and to provide proper facilities and better accommodation for the public, and therefore present the following recommendations: -

That the fountain in City Square be removed, as its location is such that it prevents a proper re-arrangement of the street car lines.

2. That the street railway tracks on Hancock Street between Temple Street and Saville Avenue be re-located in the centre of the street, to allow traffic to pass through the square on either side of the railway tracks, which is now impractical as the tracks are at

present located.

That efforts be made to induce the Bay State Street Railway Company to run their cars which connect with the Elevated through the entire length of Hancock Street to School Street. This change would undoubtedly necessitate the double tracking of Quincy Avenue from School Street to Scammell Street, or the building of a spur track on Quincy Avenue at the junction of School Street, yet the Board believes that the change would better accommodate the public, and would remove the necessity of running the Elevated cars through Temple Street and Washington Street, as at present.

4. That the Bay State Street Railway Company be requested to construct a double track on Washington Street from Temple Street to Hancock Street, and remove the present track connecting

Temple Street with Washington Street, northerly.

Waiting Room

At the request of His Honor the Mayor, the Planning Board in conjunction with a special committee of the City Council, have investigated the subject of a waiting room in City Square. From a conference with an official of the Bay State Sreet Railway Company, it was learned that the company had no immediate plans for establishing a waiting room in City Square, other than that now existing, and that the company considered the present arrangement of providing seat in a neighboring store as satisfactory. The present arrangements do not, however, appeal to the Planning Board as being at all satisfactory, and it therefore recommends that the mayor and the City Council take up this matter with the Street Railway Company in the hope of establishing an adequate waiting room without the necessity of petitioning the Public Service Commission.

Public Sanitary Station

From its investigations, it became apparent to the Planning Board that one of the most urgent public demands and necessities is for better sanitary conveniences in or near City Square, and while it cannot be denied that the facilities furnished by both the New York, New Haven & Hartford Railroad Company and the Bay State Street Railway Company are inadequate for the travelling public, it is also true that the City has made no attempt to furnish such conveniences for the general public.

Chapter 596 of the Acts of the year 1911 provides: "That cities and all towns having a population of over 10,000 inhabitants, shall provide in some convenient place or places at or near the business centre of the city or town, one or more sanitary stations, etc. provided, however, that if in the opinion of the Board of Health of

any city or town such sanitary stations are not necessary in that city or town, such city or town shall not be required to provide the same."

The Planning Board is of the opinion that a public sanitary station located in or near City Square is a public necessity, and with that in view, have investigated the sanitary stations erected in other cities, and have made studies of various locations in City Square where such a station could be erected at a minimum cost, and yet convenient for public use.

In many cities sanitary stations have been constructed entirely under ground in public highways or parks, but such construction would appear to be usually very expensive and the maintenance charges large, as compared with stations constructed entirely above ground.

In Brockton, Brookline and Lawrence such underground stations have been erected at a cost ranging from \$8,000 to \$10,000 with

annual maintenance charges of between \$3,500 and \$4,000.

After a careful study of various locations, the Planning Board is of the opinion that an underground station cannot be economically constructed in any portion of City Square, due in part to the elevation of the sewers in Quincy Centre, and in part to the limited area avail-

able for street purposes.

The Board, however, submits herewith for your consideration a design for a public sanitary station which could be erected above ground in the rear of the City Hall building on Depot Street. This location seems to present certain advantages: It is not over conspicuous. The cost of construction would not be excessive — the building if constructed with concrete side-walks and granite front in keeping with the character of the present City Hall, fully equipped would probably not exceed \$6,000.

The heating and lighting systems would be connected with those

of City Hall and the maintenance charges thereby reduced.

The plan as submitted provides ample accommodations for both men and women, as well as separate accommodations for the employees

of City Hall.

Such a sanitary station if erected would undoubtedly require the services of attendants during the hours the station is open to the public. However, the Planning Board would suggest that efforts be made to induce the Bay State Street Railway Company and the New York, New Haven and Hartford Railroad Company to share in the expense of maintenance, as such a station would be of decided convenience to the patrons of their roads.

City Hall

The suggestion of constructing a Sanitary Station in the rear of City Hall, immediately opens the question of whether or not this land at some future time will be required for an addition to the present City Hall building? The floor area available for many of the departments at City Hall is very limited, and the efficiency of these departments thereby greatly impaired. It is the opinion of the Planning Board that any extensive alteration of the exterior of City Hall will be unwise, and that the question of securing a site for the erection of a new City Hall building should be seriously considered.

Grade Crossing

Acting under the suggestion of His Honor the Mayor, the Board has under consideration the various changes in the highways, bridges and approaches which will be necessary at such time as the New York, New Haven and Hartford Railroad Company carries out its plan for constructing a four track railroad system through the city, as well as the changes in the location and grades of streets required in eliminating the grade crossings at Saville Street, Quincy Centre and Water Street, South Quincy, as prescribed by the decree of the Superior Court, confirming the decision of the Special Grade Crossing Commission.

While the Board has given some time to the study of the problems here involved, and to the preparation of plans to assist in their solution, it is not prepared to report at this time on a subject to such importance, and one which they have not had sufficient time to properly consider. The Board expects, however, to present certain recommendations on

this subject at a later date.

CHARLES W. BAILEY, Chairman EUGENE C. HULTMAN GEORGE W. ABELE CHARLES A. HADLOCK WILSON MARSH EZEKIEL C. SARGENT, Clerk.

COMMISSIONER OF PUBLIC WORKS 1915

Hon. Gustave B. Bates, Mayor, City of Quincy, Mass.

Sir: — I herewith submit the annual report of the Department

of Public Works for the year 1915.

For a detailed account of the expenditures of the Department, I would refer to the itemized report of the City Auditor, and I simply present the tables showing the appropriations, expenditures and balances.

Woodward Avenue from Whitney Road to Coddington Street gravel.

Deldorph Street from Whitwell to Cranch — No. 1 stone.

School Street from Franklin to Hancock both sides of the road -No. 1 stone — Tarvia X.

Cranch Street — gravel. Cottage Street — gravel. Mechanic Street — gravel.

Thayer Street — gravel.
Alleyne Street — gravel.
Chestnut from Hancock to Foster — No. 1 stone — Tarvia X — Tarvia B.

Granite from Bridge to Hancock - No. 1 stone - Tarvia X. Washington Street from Union to Mill - No. 1 stone - Tarvia X. Adams Street paved on one side to Gould's Garage — 1-3 other side. Upland Road from Adams Street to Dimmock Street — gravel. Centre Street — paved gutters.

GYPSY MOTH DEPARTMENT

Bills and payrolls approved on this account amounted to \$6,516.00 Charged as follows:

6	
Labor	\$4,100.67
Superintendent	936.00
Office	93.39
Insecticides	
Hardward and tools	65.56
Carfares	20.00
Liability Compensation	131.00
Express	
Gasoline	27.00
Water Rates	16.00
Equipment	264.92
• •	

\$6,516.00

This appropriation is not wholly used to fight the Gypsy and This appropriation is not wholly used to fight the Gypsy and Brown Tail Moths, but the various diseases which do not come under the statute law. The principal calls are for the destruction of the Elm Leaf Beetle, Tent and Forest Caterpillars, Leopard Moth, and the Scale. Our street trees show decided improvement, and the residential sections and woodlands have been improved by spraying, and the removal of dead trees and the undergrowths along the public highways.

I would recommend the purchase of another high-powered sprayer, as one broke down last spring, which necessitated working the men on two shifts from 3 A. M. to 8 P. M.

The demands of the Public are increasing so greatly that one sprayer will not be able to do the work in the future.

REPORT OF WATER DEPARTMENT 1915

During the year extensions were made on 72 streets, the sizes being from 4 inches to 10 inches. The total amount of pipe laid was 23,187 feet.

40 fire hydrants have been set, making the total number now in

use 1,078.

8,178 feet of old pipe was abandoned and was replaced by larger sizes.

467 service connections were made, making the total number now in use 9,315. The cost of installing these services was as follows; cost to the owner of the property was \$7,231.66, to the city was \$4,756.95, making the total cost of services \$11,988.61.

189 meters were set, making the total number now in use 8,248.

For further detail see the accompanying tables.

2.08 miles of sewer built during 1915 and 54 manholes, making a total to date of 74.75 miles of sewers with 1722 manholes.

10,988.78 54

The City Engineer is preparing record plans of the work done by this department and they will be placed on file in this office. The assessment on account of sewer construction is now being made.

Respectfully,

Commissioner of Public Works.

REPORT OF CITY SOLICITOR

During the year 1915 the work of the City Solicitor has been of the same general character as that of previous years. There have been about the usual number of claims against the City arising from accidents. These claims have all received my careful attention, and where I have thought it for the interest of the City and justice required it, I arranged settlement of the same.

I have examined the titles to the various parcels of real estate acquired by the City, and have arranged settlements with the owners

of the same.

Much of my time has been occupied in consulting with and advising the various heads of the departments in connection with the numerous problems arising from time to time in the work of their respective departments.

I have attended every meeting of the City Council, and when called upon to do so have advised the Council and its several com-

mittees to the best of my ability.

I have also attended many hearings affecting the interests of the City of Quincy before the Board of Port Directors, Public Service Commission, Metropolitan Park Commission, the Commissioners appointed to determine the Apportionment of Metropolitan Park Payments 1915 to 1920, and various committees of the Legislature.

During the past year in pursuance of the authority of a special act of the Legislature, which was passed at the joint request of the law departments of the City of Boston and the City of Quincy, there was arranged a settlement of a dispute in reference to taxing certain real estate owned by the City of Boston and situated in Squantum By the terms of this settlement the City of Boston paid to the City of Quincy more than Nine thousand (9,000) dollars in money, and an agreement was reached which will prevent a similar dispute arising in the future.

The following laws especially affecting the City of Quincy were

enacted by the Legislature of 1915:

General Acts, Chapter 300: An Act to authorize the construction and maintenance of a new bridge over the Neponset River between the Cities of Boston and Quincy.

Special Acts, Chapter 29: An Act to authorize the City of Quincy to appropriate the sum of Ten thousand (10,000) dollars per

year for the support of the City Hospital.

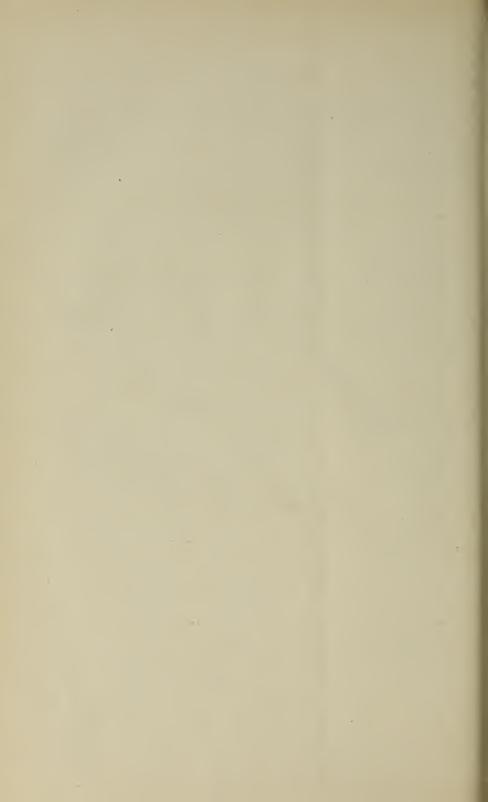

Special Acts, Chapter 32: An Act amending the City Charter relative to fill vacancies in the City Council and in the office of Mayor.

Special Acts, Chapter 51: An Act to authorize the Metropolitan Park Commission to construct and maintain a bridge over Black's Creek for the extension of Furnace Brook Parkway.

Special Acts, Chapter 244: An Act to authorize the City of Quincy to appropriate the sum of Ten thousand (10,000) dollars for the improvement of Weymouth Fore River.

Special Acts, Chapter 280: An Act relative to adjustment of taxes on property of the City of Boston lying within the City of Quincy.

WALTER L. PINKHAM, City Solicitor.

REPORT OF THE TRUSTEES

1915

To His Honor the Mayor of Quincy.

The Trustees of the Thomas Crane Public Library submit herewith their forty-fifth annual report of the Library for the year 1915.

The record of the work of the Library each year, for many years, has shown a considerable growth in usefulness over that of its predecessor. The record of the year 1915 is one of continued growth and success, in some directions, but as a whole, it is disappointing.

In our report for the year 1913, we said "The Library must either march forward or fall behind in its work. It cannot simply mark time." This statement is borne out by the figures in the Librarian's report, which follows, showing that the increase in circulation has fallen far below that of any recent year. This is owing to the scanty appropriation for 1915, which enabled us to purchase only 796 new books, to supply a demand for five times that number.

Branches

The returns from the Atlantic Branch are very gratifying, and the circulation at the West Quincy branch shows a large increase over that of last year; owing to the overcrowded condition of the rooms at West Quincy, new quarters will have to be provided there in the near future.

Fire

Owing to the prompt investigation by a police officer of a light in the Library one night in February, and the quick response of our efficient Fire Department, a brisk fire was extinguished, and the damage confined to the basement of the Library. We feel that our beautiful building and its contents were saved to the people of Quincy, and are glad to be the commender of both departments.

Library Grounds

We regret a growing tendency to use the Library grounds for Park and other purposes. It has been the desire of the Trustees to keep the grounds intact, and as they are the most beautiful spot between Boston and the Cape, we shall continue to jealously guard the interests of all our people from encroachment by a few.

Preparedness

This word of the hour is as applicable to Library work as to National defences, and we strongly urge the necessity of preparedness to meet the demands for books and for placing the resources of the Library nearer the homes of the people. When our water Department puts in a large main, with a view to supplying a growing demand for water;

when we erect a school building, with greater capacity than present needs, or purchase land for playgrounds or parks, it goes without saying it is a wise preparedness. We claim the same good business policy should be applied to the Library, and we again suggest and urge the purchase of land for branch libraries. Apropos of the above, is a petition just received, signed by over 500 residents of Wollaston, that a branch library be established in that ward; and if we read correctly between the lines, it says that the people are willing to be taxed for these privileges.

The greatest harmony has prevailed in the Board all through the year, and of the Librarian and staff we have to say "Faithful and effi-

cient - and all synonyms of those words."

Respectfully submitted for the Trustees,

CHARLES R. SAFFORD,

Chairman.

REPORT OF LIBRARIAN

Quincy, Mass., January 1, 1916.

Treasurer.

To the Trustees of the Thomas Crane Public Library: —

I have the honor to submit herewith my report for the year ending

December 31, 1915.

There is one regrettable fact that must obtrude itself through the pages of this report, namely: that in 1915 there was the smallest number of books added to the library's collection since the year 1908. Nevertheless, the past year has been one of unremitting activity on the part of all in the service of the library.

Because of an appropriation too limited to supply the needs of an institution whose growth in circulation, to speak of only one part of the work, may be seen by the figures 163,912 versus 81,355 in 1909, we have just been obliged to do the best we could with what material we had. Fewer new books to catalog, then the more time and energy to spend bringing the old ones into prominence and service. And so the two new display cases in front of the delivery desk have been put to excellent use in advertising the best and most interesting non-fiction both new and old; besides these, there have been placed in all available space on the reference room shelves books on questions of the day or subjects of current interest; such as Public health, Child labor, Panama exposition, European war, Merchant marine, Woman suffrage, and several others, including the activities of the seasons and holidays.

To go into detail of a few efforts touching upon local interest: -With the meeting of the National Congress of Mothers and Parent-teachers Association in Quincy, books on Child welfare were put on the open shelves; for the Health week exhibit we prepared a poster and published a list for free distribution of selected books in the library on Hygiene, with the books themselves on the open shelves; also we put there books on Costume for the "revellers", and on topics of the lectures before the Current events class of the Wollaston Woman's Club. In short, the "human touch" that has marked the past year's work of the library in a greater degree than usual has been a keen pleasure to the Librarian. All these matters have been the subject of our weekly notes in the "Daily Ledger", and our thanks

for this free publicity are here tendered.

In April, through the interest of Miss Campbell, director of work with foreigners for the Free Library Commission, we were enabled to have a free lecture in the Italian language by Prof. Pecorini, for which we were granted the use of the New Adams school hall by the School Department. This was attended by about 100 Italians and did somewhat to stimulate their interest in the library. It was followed by a loan of more books from the Commission, which also lent us books in the German language.

We have had the usual number of exhibits from the Library Art Club; have borrowed a set of pictures on India for an indefinite period and lent them to one of the study clubs, and had on exhibition photographs of our own and neighboring libraries by Willis Garey, and a bronze plaster bust of his father by Bruce Saville.

In an editionial of the Library Journal appears the following: — "Contrast is often drawn, both in counsel to librarians and in library reports, between statistics and 'the human touch', i.e., between quantity and quality in library work. What should be emphasized is that neither can be neglected. Quite truly the 'how much' may be of less importance than the 'how well', yet libraries must be judged by a combination of the two standards. A book well read is better than three books circulated but only half read, yet the circulation department of a library must be tested out from the financial point of view by the statistics of circulation."

Circulation - Accessions

I submit the following; the figures speak for themselves.

	Books bought	Increase
	City Appropriation Funds	Total of Circulation
1910	$†2,950$ 28	2,978 †13,891
1911	1,789 10	1,799 12,651
1912	2,345 74	2,419 12,677
1913	1,998 34	2,032 *30,427
1914	1,986 43	2,029 10,850
1915	1,083 117	1,200 2,076

†West Quincy reading Room opened

*60% of increase over 1912 due to opening Atlantic reading room In the year 1909, the first complete year in the building as enlarged, the appropriation was \$9,000. The years that have followed have brought an increase in certain fixed charges due to enlargement of building, opening 12 hours daily to the public, and extension of the library system through the two Branch reading rooms. Accordingly there was more money for the purchase of books with \$9,000 than in 1915 with \$14,764.

While each attendent at the desk, whoever may be on duty, has tried her utmost to not allow a single patron to leave the desk unsatisfied, with the diminished purchases of fiction, both new and replacements, the past year, the reason is not far to seek for the decrease in circulation from the Main desk, a large part of the demand being for the latest novels. Although this striving to please has really been more difficult than if books desired could have been supplied, and although over 15,000 volumes of our best fiction have been rotated on the open shelves, it hath profited us nothing, and the returns here show a decrease in circulation of 3,209, with a falling off in fiction issued of 2,233.

Needs

It is evident from the above that, with all our good will and best efforts, the library must decrease in circulation and efficiency unless we can have more books. If we can buy in 1916 some fiction that we have failed to purchase, as well as the new publications, buying two or more copies of these, and can have some of our good older fiction replaced by clean books, then that part of the library's work which stands for entertainment — no less a province than instruction —

will grow.

But I cannot state the need so easily when it comes to that for works on turbines and rotary engines; in fact, for all sorts of practical up-to-date works on machinery and engineering, machine-shop practice, naval architecture, mechanical drawing, and other like subjects which a library in a city with industries such as ours should most certainly be able to supply. Although the actual present need is to keep the old collection up and to buy more new books at the Central Library in order to keep it in an efficient working condition for the demands upon it of the Branches already established, the Librarian is in entire sympathy with the call from Wollaston for larger and better service from the library for that section.

Branch Reading Rooms

We were fortunate last year in being able to secure larger accommodations for the very flourishing Branch reading room at Atlantic. The enlarged work here is much more easily carried on and the circulation returns show an increase of 2,157; total 33,233, and Miss Saville feels confident that if she could get the books needed the figures would be still larger. The Branch has received gifts of books and framed pictures; had four Story Hours by Miss Packard, and supplied books for the neighboring school.

The West Quincy reading room, after five and a half years of increasing usefulness is now in cramped quarters, and larger accommodations are a necessity. It would seem economy for the library to own its Branch buildings where the growing work on many sides

could be carried on to best advantage.

In spite of all drawbacks of crowded space and lack of tables and chairs, the circulation here shows an increase in 1915 of 1,752, a total of 30,406 volumes issued. Much work has been done for better reading among the children, and with the increase of circulation fiction has fallen off over 2 per cent. Two Story Hours have been given here by Miss Callahan.

The growth of the work of these two reading rooms as shown by the above figures demonstrates the need of their having their own permanent collections for reference and school use, as well as the continuance of a deposit with 100 or so volumes exchanged monthly from the Central library. In other words, they have now outgrown the mere deposit station and reading room stage and should be Branch libraries in reality. It can be seen that with a circulation of above 30,000 at each Branch on the small deposit of 1,100 or 1,200 books, the wear and tear costs the life of the books.

A plan has already been started for a deposit station at the Fore

River Shipbuilding Corporation.

Children's Room

Although during the past year we bought duplicate copies of the few new books purchased for this room, for the use of the Main hall, Branches, and schools, both these books and the old ones have seen so much service that the collection is now entirely inadequate, and, with several hundred absolutely worn out volumes waiting to be replaced, numbers not more than 3,000 working volumes. Much as the lack of money for books has been felt elsewhere, this is really the place that has suffered most. As was referred to in the report for 1914 there is little work with the schools that we can do compared with that of other libraries for lack of funds to supply sufficient

Some few picture puzzles have been given to the Children's room, and we have a few picture books that were new "once upon a time". But all are worn, soiled and torn from constant use, a pitiful supply for the eager eyes and fingers of the children of all nationalities. would welcome most heartily any gifts in this direction or of money

for the purpose.

The "vacation reading" contest was a still greater success in 1915. Miss Weston had a library game to teach the children the use of the card catalog. Miss Packard held Story Hours as usual, started an interesting Geography club in October, which meets monthly, and had a most original Christmas party, at which the special guest was a little blind boy who sang Christmas carols to the children after their entertainment.

Cataloging

To make the resources of the library more quickly available, the cards of all the books in it should be in the card catalog. This past year has given us some time, which otherwise would have been used in cataloging new books, to make progress in this greatly needed work. Also, the 89 volumes of the United States Census were reclassified

and recataloged.

One of the best accomplishments of the year was the big undertaking in the summer of cataloging the bound magazines and making them accessible to the people directly through the medium of the two Indexes, Poole's and Readers' Guide, which use different series volume numbers. This required the handling and work on 3,000 volumes, and to Miss Hyland is due the credit for this task.

Reference Work

In the statistics of routine work in the library's several departments only the class and number of books borrowed for use outside its walls are shown. That 250 reference questions have been recorded answered from the Children's room desk; 646 from the Main hall; 560 from the West Quincy reading room, and 524 from the Atlantic reading room, means little in figures, perhaps, but means a much larger and constantly increasing use of the resources of the library for research work and study. It also means that reference books are usually expensive and that therefore much money is here needed to be able to meet this constantly increasing use of the library. It means, for instance, the need for purchase of the last edition for the Encyclopedia Britannica, referred to previously in my report for the year 1911.

Binding and Repairs

$Binding\ Account$		
·	1914	1915
Books rebound	1,484	2,818
Periodicals bound	123	195
Books repaired	17	55

Besides the above, 131 volumes of periodicals have been rebound the past year, 116 of them being some old volumes of St. Nicholas which the Children's room could spare for the poorer Atlantic reading room. In 1915 we bound only 10 volumes from sheets, a way of getting much more lasting service, as we could not afford the first cost of the sheets. We have spent \$1,196.99 for binding the past year and still there are 4 boxes of books waiting to be sent.

much more lasting service, as we could not afford the first cost of the sheets. We have spent \$1,196.99 for binding the past year and still there are 4 boxes of books waiting to be sent.

In August, at our request the binder, Mr. Michelson, kindly allowed Miss Ruth Murphy, a High school pupil who has been working with us two years, to spend half a day for two weeks at his bindery. The result is that she has done more intelligent work upon the books, and many that would otherwise have been sent to the binder have

been repaired here.

At the Library

	Adult	Juvenile	Total
Books mended	4,773	6,519	11,292
Magazines mended	1,640	1,240	2,880
Books repaired	389	104	493

Thus in order to have the greatest number of books to work with at the least possible cost we have had to mend and repair the old collection. Many of these are too soiled to circulate. We could pay 35 cents to have a book rebound, whereas we couldn't pay \$1.12 to replace by a clean copy the book that was still popular enough to be wanted.

Sunday Opening

The full season's returns leave much to be desired. It would seem that more adults in a city of 40,000 people should appreciate the Sunday afternoon privilege. The patronage has been a fluctuating one varying from 11 to 71 visitors, among which the proportion of High school pupils has increased from 35 to 52 per cent. The average number of readers has decreased from 37 per Sunday in 1914 to 31.

Staff

It is pleasant to record that this past year there have been no changes upon the staff. Also that the three apprentices, although they could not technically be added to it, have returned to us after

their summer course at Simmons College, cheerfully continuing their work as general assistants, more valuable after training and experience. After the requisite of general all-round training in the various departments of library work, it is the design of the Librarian to then place each member of the staff in the position best suited to her taste and ability. So that is always done whenever possible; and from the standpoint of business no less than from that of personal development best results are thus obtained.

Staff meetings have been held monthly during the year, at which assistants' viewpoints from practical experience are discussed. This has been found to make for still greater interest, loyalty, and pleasure in the work. A little experiment was tried of calling together occasionally all the pages and other boy workers connected with the library for a few moments' talk. The result was a surprising improve-

ment and development.

The members of the staff greatly appreciate the extra week's vacation given them by the Trustees.

Reclassification

This large undertaking has gone steadily forward, under the charge of Miss Alexander, with part time of one assistant and with High school boys to do the mechanical work of erasures, filing cards, etc. Books in the classes of Fine arts, Useful arts, Sociology, nearly all those in Literature, and about half in the classes of Science, Philosophy, and Religion have been reclassified. As the books in these classes are being used more and more both for reference and for circulation, it has been found a great help to have all on one subject together upon the shelves.

In addition to the reclassification work, cards have been made and filed in the card catalog for many of these books, which hitherto could be found only by the printed lists and old catalog and supple-

ments.

The fire which called the Librarian to the library at 2.30 on the morning of February 10, and which might have proved disastrous, makes one realize what the loss of this beautiful building with its carvings and stained glass windows would be to us all.

In the death of Alexander Nugent, the caretaker of the grounds, the library has lost one who gave to it 22 years of faithful, intelligent

service.

Appended, besides the usual statistics, are those arranged in accordance with the form drawn up by the A. L. A. Comm tter on Library Administration and adopted by the Council. This form admits of easy comparison with other libraries and is an attempt to meet the need for uniformity in library statistics.

In closing, the Librarian wishes to thank the Board for their cordial support and for the extension of vacations; and to express publicly her gratitude to the staff of faithful, interested, happy workers. For the success of the library's work depends in large measure

upon this loyal aid.

Respectfully submitted,

ALICE G. WHITE,

Librarian.

The regular meetings of the School Board are held at eight o'clock P. M., the last Tuesday in each month.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee submits its annual report for the year 1915 to the citizens of Quincy.

Under the efficient management of our Superintendent, Mr. Barbour, our schools have continued to keep up the high standard

of former years.

The City Council has appropriated this year \$203,651.73 for use in the general schools and \$12,9\$2.27 for the day and evening Industrial Schools, part of which will be refunded by the State. This large sum of money has been expended carefully and judiciously to get the best results possible. That there has been no waste or extravagance is shown by the figures compiled by the School Committee of Brookline from data in the Seventy-eighth Annual Report of the State Board of Education for the year ending June 30, 1914. In this document an itemized comparison is made of the cost of the schools as a whole and of the cost per pupil in Brookline and five other towns and in five cities of Massachusetts. These summaries are as follows:

	School Pop.	$Total\ Exp.$	Cost per Pupil
Brookline	3,970	\$278,884.57	\$70.25
Winchester	1,800	76,936.09	42.74
Milton	1,412	87,277.43	61.81
Wellesley	990	54,758.85	55.31
Weston	323	26,068.81	80.68
Stockbridge	315	20,530.51	65.18
Springfield	15,936	772,357.51	48.47
Newton	6,935	353,170.66	50.93
Cambridge	15,445	596,244.58	38.60
Worcester	22,317	957,431.95	42.91
Quincy	6,136	195,676.54	31.89

For the past year the Quincy expenditure has been \$203,208.82

and the school population 6,486, making the cost per pupil \$31.33.

From this it will be seen that compared with these towns and cities varying in school population from 315 to 22,317, the cost per pupil in Quincy is very low. This cost is about three-fifths the cost in Newton, a city of approximately the same school population. This proportion is about the same when approach with 11 the cost in Newton, a city of approximately the same school population. This proportion is about the same when compared with all the towns and cities of the State. The ratio of school expenditure to total tax levy and to total valuation is also proportionately low. This result has been attained only by the closest economy in the essentials and by dispensing with many of the luxuries of education. It is a question whether in some cases there has not been unwise and unnecessary economy. But the Committee feels that from a business as well as educational standpoint the city has obtained the very best results from the money invested.

Owing to the high cost of living and the larger salaries paid in other cities of about the size of Quincy, the elementary teachers asked for an increase of \$100 in the maximum salaries paid. After due deliberation, the School Committee decided they were not justified in that amount of increase but did vote to increase the maximum by \$50. This brings the salaries more nearly to the average for the State, although it falls far behind the amounts paid in many cities.

The matter of school accommodations has been this year, as always, a perplexing problem. The High School building, which when built was thought to be ample in size, is now over-crowded with 1,029 pupils. The Quincy Point and North Quincy districts are also growing fast and demanding larger school accommodations. This congestion will be relieved on the completion of the two buildings for which the City Council has already voted an appropriation. These buildings will also relieve the pressure at the High School, for it is

intended to have in them junior high school grades.

Some slight relief for the High School is also obtained by the Industrial School in the old Adams School building. This State-aided school receives boys with certificates from the elementary schools—boys who have no aptitude nor liking for classical studies but who are ready and willing to learn the practical work of the different trades taught. The school has proved a most efficient factor in training hand and brain. Its popularity is shown by the fact that there are nearly seventy boys now waiting to avail themselves of its benefits. It is hoped that in the near future larger accommodations may enable us to give to these boys the education which they desire and need. We wish to express our appreciation to the manufacturing concerns in the city who have assisted us in training the boys in trades during the past year and trust that they will not have any cause to regret their action in so doing, and that they will continue in the policy that they have followed in the past.

A similar State-aided school for girls will be established in the coming year — a school for 'home-making'' where girls will be taught the scientific and practical details of keeping house in all its branches, a knowledge sadly needed at the present day. The school should be in a private house and it is hoped that the Arnold house, recently

purchased by the city, may be utilized for this purpose.

During the past year the Atherton Hough School building has been enlarged and occupied and now accommodates the growing school population of Hough's Neck. It is hoped that the purchase of additional land about this school may be accomplished in the near future. The recent addition to the Coddington lot is a most welcome fact.

We have enlarged the scope of the Evening Schools, both State-aided and city, with the result that today our evening classes will compare favorably with any other city in the State. We wish to call the attention of the citizens to the classes which are being conducted for foreigners, and submit for their consideration whether or not the wisest policy is being pursued. Different nationalities have been represented in the Evening School during the past year as follows: Americans, Armenians, Austrians, English, Chinese, French, Finns, Germans, Hebrews, Greeks, Italians, Russians, Spaniards, Swedes, Syrians, Poles, Turks.

The enrollment in these classes was over 600, and the average evening attendance, 200. We believe that the best, in fact the only way to teach those who come to our shores the respect which they should have for the flag, for the country which it represents, and for its institutions, is to enlighten them as to what it means to be given the freedom which they enjoy, to teach them of the lives and deeds of those men who made and preserved this great nation, and that they must become citizens of the country, adopt it modes of living, associate with its people and become Americans like those of ourselves, who though perhaps born here can look back not in the very dim distance, and see our own ancestors coming from distant shores. We must do these things if we are to have an America that will mean what it should mean to those who will follow in our footsteps. We invite those of our people who may be interested to visit one or more of these classes at any time and see what is being done, and we know that the only conclusion that can be drawn is that they are a success.

To the question of the age limit for the admission of children to school and of the length of school sessions for primary children, the Committee has given full and mature consideration, having the interest of the child in view. The members have been influenced by two facts - first, the over-crowded condition of the primary grades which, in many cases, would not permit the admission of younger children or keeping them in school for longer periods, even if it were desirable. In some districts, on petition of parents, the children of the second grade have been allowed to attend two sessions each day when room was available. The School Committee does not believe that the schools should be made a day nursery to relieve over-worked or over-nervous mothers.

The second fact influencing the members is the large preponderance of expert opinion - both educational and medical - that young children are better in the open air and that young brains should

not be fatigued before the age of seven.

Last year the Women's Club very generously offered to pay the expense of a school nurse for one year, and Miss Marion Jackson was installed in the position. Miss Jackson has proven most efficient and helpful both in the schoolrooms and in the homes and has contributed largely to the good health and comfort of the pupils. A school nurse is now a necessity and the expense must be assumed by the taxpayers at large. Two or more school nurses could be well and profitably employed.

A free dental infirmary is one of the utopian dreams of the near

future.

The School Committee wishes to take this occasion to record its appreciation of the cordial support accorded by the executive and

legislative branches of the city government.

The foregoing report, presented by a special committee consisting of Dr. Nathaniel S. Hunting, Mr. Arthur W. Newcomb and Mr. Joseph H. McPherson was adopted as the annual report of the School Committee of 1915.

ALBERT L. BARBOUR.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

Mr. Chairman and Gentlemen:

I have the pleasure of submitting my seventh annual report as Superintendent of Schools, which is the forty-first in the series of such reports issued from this office and accompanies the sixty-fifth annual report of the School Committee.

Finances

The financial part of this report, which is given as an appendix while of little general interest of itself, is of considerable significance when used as a basis of comparison. When viewed in that way, entirely aside from the fact that it indicates most economical expenditures of our recources, it also goes to show either that this community is expending too little upon its schools or that other communities are expending too much. Undoubtedly the former is the case. If we consider further the table printed in the report of the School Committee on a preceding page and if we go more widely into comparisons so as to include all the cities of the State, by making a comparative analysis of detailed expenditures, certain inferences appear which are of interest and worthy of record.

The overhead cost of administering the schools of this city, which includes all the expenses of the Committee and of the Superintendent's office, while it is very low, has been indicative of good business management rather than need of more funds. The growth of the city's school business will compel the School Committee during the present year to remove its offices to more commodious quarters, which with an increase of clerical force will cause a slight rise in administrative

expense.

Approaching the next and the largest item of the school budget. instruction, it would appear that the per capita cost for that purpose is lower by a wide margin than in other cities. This is due to two causes, a lower salary scale, and, more especially, a larger number of pupils per teacher. Both conditions are unfortunate; both are in process of being remedied. The School Committee has already raised the maximum salary of its elementary school teachers. The completion of our two new school buildings, already authorized by the city, will enable us to make headway in caring for the other condition mentioned. Another consideration leading to the low per capita cost for instruction is the fact that Quincy is, as yet, doing little in the way of specialized or differentiated work. It is true we have some excellent prevocation classes but we are doing nothing for atypical children or for those whose physical condition calls for instruction in surroundings different from those of the ordinary schoolroom. Neither is the city doing anything in the way of public kindergartens, though with our new school buildings it may soon be possible to make a beginning.

In the expenditures for books, stationery and other school supplies, our showing is not unsatisfactory nor niggardly. Our schoolrooms

are well provided with the material for instruction without that expensive profusion that is apt to tend to waste. Possibly the criticism might be made with justness that books occasionally remain in use beyond that period when a close adherence to the rigid rules of hygiene would call for their disappearance. However, we are annually doing better and better in this respect and there would

appear little cause for complaint.

As to our expenditures for the operation of the school plant, the per capita costs of this city rank very low for several reasons. In the first place, because of a fortunate building policy which Quincy has pursued for many years, it finds itself possessed of fewer but large: buildings than other cities of its size. There are cities with about the same school population as Quincy that have twice as many buildings, many of them small, many constructed of wood, all of which causes a greatly increased expenditure for jani ors' salaries and fuel. Our city has no school building of less than eight rooms and will hardly build one as small as that again except it be planned for future enlargement. The fact that our buildings are of brick means lower cost both for operation and maintenance. The same condition, too, which operates in the reducing; of cost of instruction operates here, namely, the large average number of pupils per room.

The annual per capita cost for maintenance, which includes repairs, replacements and general upkeep, is very low, much lower than it would be were the School Committee in control of these costs. It would seem good business policy to keep the school buildings painted sufficiently often to resist the weather and to remove, at intervals, the interior marks of wear and tear. Now that the Boy's Industrial School is well established, it is able, if given the opportunity, to take care of all electrical, steampipe and carpentry repairs at the

mere cost of materials.

Our expenditures for the promotion of health have been so low as to be practically negligible, inasmuch as the city, through its Board of Health, has limited the scope of this work to the employment of school physicians at a compensation insufficient to pay for any constructive effort. The School Department will hereafter employ a school nurse and should have several. An efficient and adequate system of medical inspection by school physicians properly compensated is urgently needed.

For the general miscellaneous expenses of administering the schools, this city is able to show a low cost because of careful management, since, aside from the payments for transportation, there are few expenditures which cannot be itemized under other headings.

In general, from the foregoing analysis it may be said that from a financial standpoint the greatest needs of the schools are additional schoolrooms, which will allow more careful and effective teaching, and for a greater expenditure by the School Department for the promotion of health. Can Quincy afford to neglect either need?

School Buildings and Accommodations

Every city which is undergoing a rapid increase in population and is changing to the "large city" type has a constant problem to provide the necessary school accommodations. As fast as one point of congestion is eased another presents itself, and there is the constant necessity of providing not only for present needs but so far as it may be forseen for future growth. The city of Quincy is not only growing at a rapid rate but the degree of rapidity is steadily increasing. All through the past year there have been cases of overcrowding in several parts of the city, notably at the north end and the Quincy

Point sections.

In providing for these sections appropriations have been made for two sixteen-room buildings. As these buildings are to be located in sections which are central in each instance to two or three other districts which are rapidly increasing in population, the wisdom of constructing buildings of that size ought to be apparent. It is far better policy to build with an eye to the two or three years that are ahead than to construct buildings which just fit immediate needs and have no margin for the future; not only better, but cheaper. In both cases where buildings will be constructed the present year the plans have been prepared with an eye to later enlargement. Neither of these buildings will be ready for occupancy much before January 1, 1917, so that we may look forward next year to much overcrowding. Probably it will be necessary to use both the Coddington and the Wollaston assembly halls for ordinary schoolroom purposes, which can be done very satisfactorily; the Washington School building will be occupied in every nook and corner and the Massachusetts Fields School may be obliged to send one of its upper grades to the Wollaston School hall temporarily, in order to provide for the smaller children of the district. At the High School, where the enrollment the past year has been between 1000 and 1100, a considerable increase is expected in September and it will probably be necessary to use the assembly hall as a study room for about one hundred pupils. It may be possible later, with the opening of new school buildings, to relieve the situation by the application of the Junior High School plan, which will retain pupils in some courses in the buildings of their own districts until the sophomore year of High School work. This plan of school administration is making quite rapid gains, and has some marked merits as well as possible failings. It is the purpose of the Superintendent to investigate the proposition thoroughly during the present year for the purpose of finding out whether and to what extent it may be efficiently and economically adapted to our needs.

Wards 3 and 4 are at the present time showing a marked gain in school population; the latter ward after a long period of decreasing population turning about sharply in the other direction. The new buildings which are being constructed this year can have no effect on these two wards, and as there is now but one unoccupied school-room among the school-houses of these wards, it is probable that their needs will come up very shortly after the problem has been solved for

the rest of the city.

The purchase of a school lot at Squantum provides a central location for a building when the growth of the city in that section shall have reached a point where its construction shall be justified. The purchase of the lot at this time shows excellent planning. When it shall seem wise to construct a building, the same judgment would call for a building which should be just one unit of the large building which this section of the city will some time in the future demand. Just at present and contrary to expectation, the growth in school population in Squantum is at a standstill.

The opening of the addition to the Atherton Hough School came at a time when the conditions were becoming almost unbearable.

While the needs of that part of the city are now amply met, its rapid growth makes it plain that in a comparatively short time more rooms will be needed.

Safe School Conditions

The fundamental consideration in school administration is the safety of school children, and that includes safety from any harmful influence that may affect them while in the public charge.

A distressing fire disaster this past year has caused a general and close scrutiny of schoolhouse conditions throughout the country with reference to fire hazards. This has been true of our own city, where every effort has been made both now and in the past to make

conditions as safe as might possibly be.

None of our school buildings are fireproof; on the other hand none could in the slightest degree be called fire traps. In all cases means of egress are ample and unblocked; stairways are regularly and closely inspected to prevent the storage or accumulation of inflammable material beneath them; the janitors are required by the rules of the Committee to remain on the premises all the time and boiler rooms are well set off from the stairways.

I would suggest, however, that the proper authorities having charge of the repair and upkeep of our school buildings examine them with reference to the recommendations recently issued by the Metropolitan Fire Commissioner. For a comparatively small amount of money, the changes recommended might be made in all buildings where indicated and the city might have the feeling that there was nothing left undone which could contribute to the safety of the school children in our present buildings.

One practice concerning which there may be question is the common and long standing one of treating the floors with dust layer to reduce the amount of dust in the schoolrooms. Unquestionably this renders floors more inflammable; on the other hand the condition

of the air in the school building is greatly improved.

Fire drills are held in every building at least once each month and generally oftener. These are so conducted that crowding and haste may be eliminated and every detail is planned with this end in view.

It has been the practice in this city in conducting fire drills, not to pass through the coat rooms at time of fire drill nor to take the varse as the children pass out. Objection has been raised to this, but it is worthy of note that the New York Fire Department's recommendations support the position of this department, that at times when the fire alarm is sounded pupils should leave by the most direct way, not passing through coat rooms or having their hands encumbered with their outer wraps. The Boston School Committee has recently taken the same stand. It is needless to say that fire drills are conducted only on days when the weather is suitable for the purpose.

In the new buildings which are to be constructed this year, the Committee has insisted that the heating apparatus be placed entirely outside the main building instead of in the school basement. I have a feeling that the future will see a large increase in the number of fireproof buildings as well as buildings of the one-story type. The latter building takes up much more room, of course, but it has an

absolute safety and an economy of construction which has already

commended it to several large cities.

Given safety from fire, the next problem is to secure good ventilation. Just at present the ventilation situation is in an unsatisfactory condition, not locally especially, but throughout the country. It is agreed that the ideal schoolroom should provide air as near as possible like the conditions of the outdoors. It is also agreed that none of our present schoolhouses are meeting the need.

The difficulty seems to lie in the fact that wherever the air supply

The difficulty seems to lie in the fact that wherever the air supply is ample in amount it is so superheated as to be devitalized and robbed of those properties which make for health. Furthermore, there is a large proportion of investigators who are firmly convinced that the plan of exhausting air from the schoolrooms at a point near the floor

is fundamentally wrong.

It may be stated with some degree of assurance that, more and more, the schoolhouses of the future will take their fresh air direct from outdoors instead of through the basement. Certain experiments based upon this belief were investigated by the School Department, which hoped that they might be adapted to the buildings now in prospect. Although the State law apparently does not yet approve any but the stereotyped form of ventilation, it is worth noting that there is a rapid turning away from the old methods and that the State itself has taken up this better type of ventilation in the construction of some of its own buildings.

The good that might be accomplished for our school children through the agency of a school nurse was discussed in the report of last year with the announcement that one would be provided for the year 1915 through the generosity of the Quincy Women's Club.

The year's work of Miss Marion J. Jackson, who was appointed in this capacity, has amply borne out what was prophesied in the way of good to come from it and the School Committee has now taken over the future expense of this work. Just to illustrate the amount of good which has already been accomplished, practically all of which would otherwise have remained undone, the following extracts are quoted from the summary of the work of the year which Miss Jackson has compiled as her report.

Report of School Nurse from February 1, 1915, to December 31, 1915

6188 children examined for various causes.

1018 cases referred to the School Physician.

767 home visits made.

100 children taken to the Eye and Ear Infirmary, Boston.

66 cases of corrected vision through the office of the School Nurse.
23 operations for tonsils and adenoids through the office of the School Nurse.

150 children taken to the dental infirmary.

48 visits made by district nurses for surgical dressings or visits that the School Nurse was unable to make.

8 children and two mothers taken to the T. B. Dispensary, Quincy.

11 children taken to the Boston Dispensary Skin Clinic. 11 children taken to Boston Dispensary Medical Clinic.

The Associated Charities supplied glasses for two children, shoes for two children, one set of underclothes for two children, and summer outings for three children.

The Catholic Club supplied glasses for two children, shoes for two children, rubbers for four children and two prescriptions for medicine.

Kathryn Crane Club supplied one pair of glasses, one pair of shoes, and paid car fare to the dental clinic for needy children.

St. Mary's Guild supplied a pair of glasses for one child.

Overseers of the Poor supplied a pair of glasses for one child.

Obtained services of the City Physician for four children and hospital treatment for one child. One Quincy dentist gave free treatment for three children needing immediate dental attention.

With the assistance and co-operation of the Associated Charities. a family of four children, being brought up under bad home conditions.

were placed in the care of the State.

Four hundred and forty-four notices were sent to parents of chil-

dren with defective teeth.

Tooth brushes and powder are being supplied to the children in

the schools at actual cost.

Three volunteers assisted during the summer in taking ten children once a week in to the Forsyth Dental Infirmary, although no provision was made for any summer work.

Since October 1, one volunteer has been assisting in taking the

children to the Dental Infirmary.

Names of thirty-four families were given to different charitable agencies for Christmas dinners and toys for children. Thirty-one families were taken care of from this list.

The volume of work such as the foregoing statements indicate is surprising in its amount and comprehensiveness and when it is considered that without the office of a school nurse all this work would have remained undone, it puts to silence at once any who might be so in considerate as to question the propriety of this work as a function of the School Department. The establishment of this work is a monu ment to which the Quincy Women's Club may well point with pride as one worthy of the sacrifice and effort which it cost.

Evening Schools

We are making steady progress in developing our system of evening we are making steady progress in developing our system of evening instruction. The European war is restricting the number of immigrants has reduced very materially the number of illiterate minors now in the city for whom evening school instruction is compulsory. This has, of course, decreased for the present winter the attendance at the schools for non-English-speaking people. On the other hand, the number of illiterates who are now in attendance because of a desire for a knowledge of our language and our citizenship is steadily on the increase. The School Department has opened this winter a new school in the Washington building attended wholly by Syrians, and a teacher has also been supplied for an earnest group, meeting in the Syrian-American Club Room. Both these schools were opened in answer to petitions from the men themselves and a petition from in answer to petitions from the men themselves, and a petition from the Willard Evening School has led to the extension of term at that

school from forty to sixty nights. There are probably more seekers for citizenship among evening school pupils than at any other time in the history of the city, and all these schools might well be called Citizenship Schools.

At the High School, as usual, elementary commercial classes, civil service classes, and drawing classes have been maintained with an attendance larger than in any previous year and with more teachers employed. The time is not far distant when by law the city will be obliged to maintain a regularly organized evening high school. This school will naturally grow out of the classes already organized. So far, there has been a remarkably small amount of inquiry for work of that nature. If the demand, which certainly must exist, could evidence itself to the School Department, it would be possible to develop our present school gradually to meet that demand. Most of the elementary commercial work and civil service preparation which is now given is not work of a high school grade nor is it sought for by persons who expect to make it a function immediately in their life work as in the case of the industrial evening classes. For that reason it falls farther below the level toward which we aspire than our other evening school work.

The drawing classes, on the other hand, are very successful and effective, their membership being made up of persons who know what their needs are and who take the direct path to satisfy them. A large part of the membership would join trade classes if there were sufficient pupils to warrant a class in their particular trades. So far as possible the effort is made to adopt the instruction to each individual pupil

his own occupation.

High School

The High School has had another year of efficiency and growth. The statistical tables on later pages of this report show how rapidly it is increasing in numbers. It has already passed beyond the seating capacity of its classrooms and its assembly hall has been called into use for study purposes. The same thing will be done next year to an increased extent. The housing problem is the greatest one before the school at the present time. It is possible to handle the situation in two ways: either by extending the hours during which the building is in use to include the afternoon hours, or by an application of the Junior High School plan in such a way as to retain in the home neighborhood freshman classes or portions of them. The latter plan presupposes plenty of available classrooms in the other schools, which at present at least are not available.

Aside from the fact that this plan would retain many of the first year pupils in their home districts until the second high school year, it offers opportunity for early differentiation of work which should

prove of considerable value.

To the plan which would open the school building throughout the day for regular school work there can be but little serious objection. In fact, the sudden and remarkable growth of our New England high schools during the past decade has brought many communities to the point where they are now doing just this thing. At any rate, the administrative difficulties of our High School do not need to be considered critical for two or three years at least. That the school is doing very efficient work on all sides there can now be but little question. The college preparatory courses are sound and successful, the commercial courses are in a position to supply excellently trained clerical assistants and the other departments are all live and progressive With the opening of the Home-Making School in September, it may be advisable to reduce to a considerable degree the amount of work along this line that the High School now offers. The two schools should not parallel each other. The same may be said of the manual training courses offered to boys, and the Industrial School. That will be a matter for future observation and adjustment.

It may not be generally known that the Quincy High School is being conducted with a smaller corps of teachers than most high schools of its size or even smaller. It is essential that we should increase gradually the number of teachers so that the recitation groups may be made smaller in all departments, especially the freshman classes where

there is the greatest need of individual attention.

In this connection should be mentioned a recent ruling of the State Board of Education, declining after the present year to grant the certificate privilege for entrance to its Normal Schools on the same terms as heretofore, namely, the possession of the same privilege from the College Certificate Board but imposing new and arbitrary conditions over and above those required by the colleges. These conditions, while they do not add to the amount of work or the excellence of work done by the candidate for admission to Normal School, make certain restrictions as to size of classes and number of pupils instructed by one teacher which may cause a material addition to the number of teachers employed. If the possession of this certificate privilege is considered of any value to the school it will be necessary to meet these demands.

The report of the Head Master, Mr. Collins, is appended herewith.

MR. A. L. BARBOUR,

Superintendent of Schools:

I have the honour to submit herewith my fourth annual report as

Head Master of the High School.

The membership of the school has shown a considerable increase during the past year and this, of course, has seriously affected the overcrowded condition which previously existed. It will be necessary another year to resort to some strenuous measures, such as double sessions or making the assembly hall into classrooms, to accommodate the pupils who will be attending the school. Below is given a comparative statement of present membership with that of previous years.

	1915	1914	1913
Whole number enrolled,	1055	987	937
Whole number at date,	997	933	864

There was more than the usual number of changes in teachers during the summer, but it is a pleasure to note that the work of the school did not suffer because of these changes and that the excellence

of instruction has in no way been impaired.

The past year has been devoted to consolidating what has already been gained rather than making great advances in any particular line. Two departments, however, should, perhaps, receive some special mention: the Art Department and the Domestic Science Department. The former has been so conducted as to be of highest service to all other departments and to the various outside activities of the school. As an example of the efficiency of the pupils in this line of work, there was designed, in connection with the English Department, a school

calendar which had a considerable sale among the pupils and friends of

the school during the Christmas season.

The Domestic Science Department, which has charge of the school lunch counter, undertook in October the difficult task of furnishing luncheon to the delegates to the State Convention of Parent-Teachers' Association, which was held in the school hall. On the three days of the Convention, attractive and appetizing luncheons, similar to those usually provided for the pupils, were served to several hundred delegates, who gave ample evidence of their appreciation of the efforts in their behalf and highly commended the manner in which the school lunch counter is conducted.

The school has been able during the year to find employment for a large number of boys and girls in a variety of occupations. There have been constant calls for stenographers, bookkeepers, clerks, girls to take care of children, and the like, in such numbers that it has not been possible to provide pupils, either past or present, to meet the demand. Another year an attempt will be made to establish a school employment bureau under the charge of one of the teachers which will find employment for pupils and fill positions of various kinds for employers.

There have been organized among the pupils of the two upper classes three clubs: namely, the Boys' Debating Club, the Thalia Club for girls and the German Club. These clubs are all under the supervision of designated teachers and the condition of membership is satisfactory scholarship. In the case of the German Club, excellence in that language is necessary for membership. A number of pupils have by these means an opportunity for social intercourse and at the same time a chance for extended development along the lines of debating, literature, dramatics and conversation in at least one foreign language. The spirit of these clubs has been thoroughly democratic, so that they have been a help to the work of the school rather than a hindrance, as is often the case with pupils' clubs.

Each year it has been the custom of the managing board of the school paper, The Golden Rod, to hand to the Head Master the profits of the paper to use for the good of the school. With this money there has been purchased a projecting lantern with illuminating devices for both assembly hall and classroom, together with a valuable set of slides furnishing illustrative material for nearly every department of the school. Since they were purchased, the lantern and slides have been in constant use in a large number of classes and have proved themselves to be a great help in presenting lessons, particularly in such

subjects as English, history, and commercial geography.

During the year an Alumni Association was formed which has shown a material interest in the welfare of the school. It has already presented a set of O. Henry's stories to the library and has given a considerable sum of money for the support of athletics. The school is also indebted to Mrs. F. B. Smith, who presented to the school library a complete set of Ridpath's Library of Universal Literature.

The Wollaston Woman's Club found a happy way of being of service to our young people by establishing a scholarship to be used in paying the tuition at college of some young woman residing in Wollaston who was maintaining a creditable standing and was to graduate either from Woodward Institute or the High School. After due consideration, this scholarship was awarded to Miss Alice Marion Simpson of the High School, who entered Boston University.

It would not be fitting to close this report without an acknowledge-

ment of gratitude to you and the School Committee for your assistance and loyal support and to the many friends of the school throughout the city who have never been weary in well-doing for the benefit of our boys and girls.

Respectfully submitted,

ERNEST L .COLLINS,

Head Master.

Home-Making School

For a long time I have had a feeling that there was a distinct field in this city for a school for girls which should prepare for the life which most of them are going to lead after they leave school, the life of the home. To a great many girls the High School course is a barren outlook; higher mathematics and foreign languages have little appeal to such girls and even less value. Many of them are ging to stay in school only two or three years and can look forward only to a frag-

mentary education.

With this in view, the plans for a Home-Making School have been prepared. Such a school will have a two-year course instead of four. It will specialize in the arts which go to make an efficient home and will ground them on a scientific basis. While the primary object of the school will be to prepare for the home and to teach the arts used in the home, the graduate will be sufficiently well grounded in cooking, dressmaking and millinery to turn her skill to profitable use in a commercial way if she so desires. In addition to the practical work, an equal amount of time will be devoted to academic work, with a view to developing culture and intelligence as well as domestic skill. Very opportunely, the city has acquired the Zenas Arnold house on Coddington Street, which provides us with a centrally located eight-room building, exactly suited for our purpose the first year, and which lends itself very readily to a plan of future growth.

In order that it may be understood exactly what this school will

do, a fairly complete tentative outline of work is submitted.

Home-Making Course

Total number of hours — 44 per week.

Practical work (9 hours in the home, 13 hours in school, 6 hours of which can be used also for home work, if advisable), 50% - 22 hours.

Related work, 30% - 12 hours. Cultural, $20\% - 7\frac{1}{2}$ hours.

Assembly (Music, Current Events); time, 2½ hours.

Total 44 hours.

Home Project Work

Nine hours of definite home work will be assigned each week. The problems of the previous week in the classroom should be assigned as far as possible for home work. This is one good way to review and test. Teachers will be expected to visit from home to home during these periods of home work to see if work is being done as it should.

Suggestions how time might be divided for home project work:

*One hour, home cooking, between 4 and 7, Monday P.M.

*One hour, dressmaking, between 4 and 7, divided, Tuesday P.M.

*One hour, home cooking, between 4 and 7, Wednesday P.M.

*One hour, home dressmaking, between 4 and 7, Thursday P.M.

*One hour, care of children at home, between 4 and 7, Friday P.M.

*Note. Work can be assigned along the lines of any of the practical subjects during the periods between 8 and 12 o'clock Saturday A.M.

Practical, 50% - 22 Hours

Subject	I	II^{z}
1. Dressmaking	. 8	6
2. Millinery		$\frac{2}{c}$
3. Cooking		1
5. The Care of Children	. 1	1
3. Home Care of the Sick		1
7. Housecleaning, Repairs and Minor Changes	. 1	1

^{*} Teacher assigns one hour some time between 4 and 7, to suit the convenience of the family in question.

Related Work, 30% - 12 Hours

Subject	I	II
rithmetic		2
nglishextiles.	. 1	$\frac{2}{1}$
ygiene (Household), (Personal)hemistry (Household), (Science)		1 1
esign istory.	11/2	1
eography. hrift, Savings, Insurance.	1	1

Cultural, $20\% - 7\frac{1}{2}$ Hours

Subject	I	II
History. Literature, Lectures and Reading. Art Appreciation. Gymnasium. Citizenship. Music 2½ hours. Current Events (Assembly Time)	$\frac{1}{2}$	$\begin{array}{c} 1^{1/2} \\ 1^{1/2} \\ 1^{1/2} \\ 1^{1/2} \\ 1 \\ 2 \end{array}$

Details of Subject

Cooking - first year, 8 hours.

To prepare and serve home breakfasts and lunches.

To prepare and serve school luncheons.

3. Use of cook-books, marketing, making out menus, care of supplies and left-overs and food values as far as it is necessary in preparation of home breakfasts and lunches, also school luncheons.

Cooking — second year, 6 hours.

Preserving and pickling.
 Preparation and serving of home dinners.

3. Same points should be covered as in "3," first year outline.

Dressmaking — first year, 8 hours.

1. Hand sewing as applied in simple underwear, curtains, table covers and other household furnishings.

2. Middy blouse or simple wash dress.

A certain portion of the time should be given to mending clothing. (Pupils should bring a change of clothing each week to wash during the laundry period, and then mend the same.)
4. Use of commercial patterns, cutting, fitting and making should

be taught as far as necessary in doing above work.

Dressmaking — second year, 6, hours.

Waists, tailored and lingerie.

Simple wash dress.

3. Wool skirt. 4. Woolen dress.

The same points should be covered as in "3" and "4" first year.

Millinery — first year, 2 hours.

Same as Worcester outline for second year.

Millinery — second year, 2 hours.

Same as Worcester outline for fourth year.

Laundry — first year, 1 hour.

Same as Worcester outline for first year, also washing pupils' own change of clothing.

Laundry — second year, 1 hour.

Same as Worcester outline for third year, also washing pupils' own change of clothing.

Home Care of Children — first year, 1 hour.

(a) Hygiene.

(b) Clothing. (c) Sleep.

(d) Exercise.

(e) Stories and games suitable for young children.

Note. This work should be taken up in connection with milk and baby stations, day nurseries and pupil's own home.

Home Care of Children — second year, 1 hour.

All practical work. Pupil should be made responsible for some young child, preferably in her own home, for at least a one-hour period each week.

Home Care of the Sick - first year, 1 hour.

Care of sick room: (a) Ventilation.(b) Heating.

(c) Dusting, sweeping, lighting, etc. (d) Care of bed.

Second year, 1 hour.

(a) First aid to the injured.

(b) Care of children and adults during convalescence, which will necessarily mean a review of the first year's work.

The development of the school system on the side of industrial education is discussed in full on another page as apart from the common

school system.

It only remains to be said that from the whole broad standpoint of public education the situation in this city is most healthy. Not only do the city authorities and the citizens at large meet the demands for new schoolhouses and increased school budgets as they gradually appear, but there appears a constant readiness to recognize real value in new ideas and a willingness to test them out. To this community spirit we may attribute our public playgrounds, our school nurse, our industrial schools, both day and evening, and the extension of the evening school system. To this spirit we may look later for the introduction of the kindergarten, and the development of correspondence school work to be offered by the State.

This type of work last named is one which has been exploited and developed very widely by corporations organized for that purpose and to this type of instruction many of the young folks of this city owe much. The State is now undertaking to do this same work without cost except the necessary incidental expenses. If it is able to do it with the skill and aggressive power that commercial organizations have shown, then it will prove a great boon to the young folks of all our communities and the School Department will do its best to bring

this work to the attention of the community.

The School Department has as its main function, leadership in all educational matters of general interest. As Superintendent, I have endeavored to point and urge the way wherever the educational interests of the city could be advanced. Such measure of success and promise as we have been able to obtain has been due to the co-operation of the members of the School Committee and the teaching force with whom it is my great pleasure to be working.

Respectfully submitted,

ALBERT L. BARBOUR, Superintendent of Schools.

REPORT OF THE QUINCY INDUSTRIAL SCHOOLS

The Industrial Schools of the city, both day and evening, have made steady progress this past year. The report of the Principal of the Day Industrial School gives some idea of what has been done there. The advisability of opening a machinists' department which he touches upon in his report deserves emphasis in view of the fact that the dominant industrial interest in this city at the present time is without question mechanical. Undoubtedly this department would have been opened earlier had it not been for the fact that it is the most expensive of all to equip for our purpose, on account of the number and price of machines needed. In this connection should be recorded the fact that the Fore River Company has given to the schools a number of machines worth several hundred dollars, which will be of great service to the department when opened. Mention should be made of the fact that to offset the cost of the school, its several departments are now doing a considerable amount of the city's repairing on public school buildings and in the future can go much further in this direction than they have thus far gone. The public in general, I believe, has little conception of the scope of this school and frequently tends to confuse it with a manual training school. It needs to be emphasized that in this school the boys are always working on a product of commercial value and so far as possible under shop conditions.

The Evening School classes both for men and women have gained over last year in enrollment, average attendance and quality of work done. At no time has the school taken any pupils who were not strictly eligible; the past year we have had not only eligibility but sustained interest. The classes for women in dressmaking and millinery have been unusually successful, having an enrollemnt of unusually fine type. Throughout the fall, five such classes have met regularly twice a week for ten weeks, and a second unit of ten weeks was begun

in December with an increase in members.

If the city should establish its Home-Making School, which is referred to in the Public School report, it would then have the nucleus of a well-rounded vocational school system second to none in this State.

The report of Mr. J. G. Spofford, Principal of the Industrial School,

is appended.

ALBERT L. BARBOUR, Superintendent of Schools.

Quincy Industrial School, Quincy, Mass., January 1, 1916.

MR. ALBERT L. BARBOUR,
Superintendent of Schools,
Quincy, Mass.

I have the honor and pleasure herewith to submit my fourth annual

report of the work in the Quincy Industrial Schools.

The co-operative school began the year with an attendance of forty-eight pupils, alternating each week between school and factory.

This number gradually grew less until we had forty in attendance when school closed in July. The reason for this decrease was on account of several of the boys from the Fore River starting on their fourth year of apprenticeship, and the failure of said company to fill the vacancies thus made.

The school has endeavored to co-operate with the industries in every way possible. The past year, at the request of the industries, the school was conducted on a five and one-half day week and was prepared to run on a fifty-two week year. The longer year, however, was not necessary as the industries requested that the boys work in

the shops during the summer vacation.

The industries were visited during the summer to see if there was any change that could be made to better the relations between the factory organization and the school. The superintendent of the Gear Works asked that the boys in his plant be permitted to alternate on a three-month-about basis, and the superintendent of the Couch Telephone Company requested that his boys alternate on a two-week-about basis. Both of these requests have been granted and seem to be working very satisfactorily. It is to be regretted that the Fore River Shipbuilding Corporation have not felt disposed to co-operate with us since September. However, we stand ready and willing to co-operate with them on any basis that will meet with State approval.

The Full-Time School

The Full-Time School began the year with thirty-six pupils enrolled in the woodworking and electrical trades. This number remained the same until September, when, on account of the failure of the Fore River to come in on the co-operative basis, the number in the woodworking department was increased from eighteen to twenty-six; also in September, the sheet metal, coppersmithing and plumbing trade were opened with an enrollment of twenty-six. To get ready for the incoming class, the pupils in the woodworking and electrical departments laid new hardwood floors, made work benches, put in new electric light system, whitewashed the ceiling, tinted the walls, etc., so that when school opened in September, everything was ready and the work started in perfect harmony with the rest of the school organization.

An itemized list of products made by the school would take too much space for this report, therefore I will briefly state that the woodworking department has completed twelve quartered oak library tables, four quartered oak teachers' desks, with double banks of drawers, two quartered oak sectional filing cabinets, and a great deal more material of similar nature.

The sheet metal department has completed seventy-two galvanized ash cans, thirty-six garbage pails, several pieces of tin furnace pipe, several pieces of galvanized furnace pipe, gasoline tanks for motor

boats, etc.

The electrical department has installed fire gongs in the following schools: Willard, John Hancock, Lincoln, Cranch, and Coddington. This department has also thoroughly gone over the electric wiring in the Industrial School.

The electro plating department has done a considerable work in nickel plating and is in a position to do work in copper, nickel and the several oxidized finishes.

The product of the various departments has been of very high standard and nearly every piece made has been sold, and we have large orders waiting.

The actual cash received from all departments for products to date

is \$712.85.

		Braintree, Bridgewater,	3 5

I would state relative to the out-of-town pupils that the Quincy

boys have always been given preference in filling every vacancy.

On account of having a large number of electrical jobs outside of the school, we have found it necessary to add an electrical instructor to our teaching force. Mr. Russell Parker, of Quincy, has been appointed to this position and begins work on January 1, 1916. For the past two years we have postponed adding a course in machine shop practice on account of the expense of equipment. As the machine industry employs the largest number of men of any industry in this city, I feel that the time has come for us to establish a course to train

boys for this industry

I have been called upon in the past year by the president of one of our industries to furnish him boys who have had some experience on machine tools. As we did not have a course in machine shop practice, I found it necessary to call upon the directors of other schools in the Metropolitan District to furnish boys with the desired shop experience. These boys have made good, but these positions should have been filled by Quincy boys, and could have had we maintained a course in machine work. This same manufacturer has visited the school several times and is very eager to have a machine course started in this school. I would, therefore, most earnestly recommend that we establish a course in machine shop practice to begin in September, 1916.

In closing, I wish to express my gratitude to you for your helpful advice and co-operation in the past year, and thank my instructors

for the hearty co-operation which they have given me.

I would also express my sincere appreciation and thanks to the several managers and superintendents for their help and co-operation, and especially would I thank the Fore River Shipbuilding Corporation for their donation of five machines for the machine shop, the Couch Telephone Company for their kind donation of seven intercommunicating telephone sets, and the Boston Gear Works and the Couch Telephone Company for the loan of apparatus which was used in connection with the photographic exhibit of this school at the Panama-Pacific Exposition.

Respectfully submitted,

J. GOULD SPOFFORD,

Director.

Engineer and Janitor Allan W. Walker At a meeting of the Board of Directors held January 4, the report of the Superintendent was accepted, adopted and ordered printed as the report of the Board.

REPORT OF THE SUPERINTENDENT

To the Board of Directors of Woodward Institute.

Gentlemen: I have the pleasure of submitting my seventh annual

report as Superintendent of this School.

Statistics appended to this report make clear the conditions of enrollment, attendance and general distribution of work, which do not vary greatly from last year.

Each year, the question is asked by an increasing number of girls about to graduate from grammar school and eligible to enter this school, —"What has Woodward Institute to offer me for an education?"

The answer has been somewhat as follows: "Woodward Institute offers you the undoubted advantages of study in a school specialized for girls, where there is a marked freedom from the distractions which are inevitably present in a mixed school or in a large school community. It can offer you exceptionally strong courses in preparation either for college or normal school, combining scholarly instruction on the part of the teaching force with the close personal oversight which the principal is able to give each individual in the small school groups. It offers, further, a fairly wide group of the accepted secondary school subjects from which you may select those which will contribute to your comfort, intelligence and culture in case you are not going on to a higher school.

"But — Woodward Institute makes a demand as well as an offer. It demands of you in return for its advantages a more faithful attendance, a more conscientious effort and a closer application than the public school would ask. Furthermore the Institute will insist on

its demands."

These have been the answers which we have been giving each year

to our prospective pupils.

Each year we have been laying more and more stress upon good scholarship and the necessity of doing thorough work if a girl is to enter this school. This emphasis may well be continued and still further deepened. It should be borne in mind by every girl who enters our school that we are going to make larger demands upon her time than the average public high school can well do and we are able to make these demands with the more assurance because the school is not obliged to harbor the pupil of indifferent attitude or low scholarship. To establish and hold high ideals of scholarship may well be the distinct mission of the school standing apart as it does in a city of constantly and rapidly growing population.

It is an aid in this direction that we are constantly attracting a

It is an aid in this direction that we are constantly attracting a large number of pupils who are in preparation for college or normal school. This choice, of course, of necessity presupposes close and sustained effort, and the presence of so large a number of pupils with this aim tends to steady and determine the purpose of the whole school.

One of the most difficult things that every high-grade private school has to overcome is the widespread feeling that the private school is

a haven of refuge for those who wish to avoid the strenuous effort of the public school. Our effort is to raise rather than lower this standard and to make it plain that Woodward Institute stands only for thorough and excellent scholarship under a tutelage which will lead toward fineness of character. There is every indication that our continued and consistent efforts in this direction will bring the desired results.

This year, for the first time in three years, there was a request for instruction in cooking and sewing on the part of the senior class and courses have been provided in each subject. The instruction in cooking for two periods each week is being given by Miss Elizabeth M. Douglas and the work in sewing is under the direction of Miss Hazel H. Wavle. Both these teachers are on the teaching staff of the Quincy High School and their services are secured by arrangement with the public school department of the city.

It is hardly necessary to say that both courses have been so planned as to provide the maximum of useful work for those who elect them.

Mention was made last year in this report of the unusually ingenious and profitable work done in the science department of the school. Just at present, the department is making itself helpful by compounding and preparing hundreds of bottles of tooth powder which the public school nurse has sold at cost in the elementary schools of the city.

It is a pleasure to note the return of Miss C. Louise Steele to the English department, after a year's leave of absence spent in the West; Miss Taber, who acted as substitute for the year, has taken similar

work at the Quincy High School.

The material condition of the school building and its equipment is excellent. The roof has been entirely reslated during the year, a sanitary drinking fountain has been installed and a fire alarm gong put in place. The close scrutiny of school buildings which has taken place during the last few months with reference to fire hazards finds us with little to apprehend. The many exits to the building, its freedom from overcrowding and its general arrangement give us confidence that it is as free from possible danger as any wooden school building can be.

The Institute acknowledges with thanks the gift of a picture,

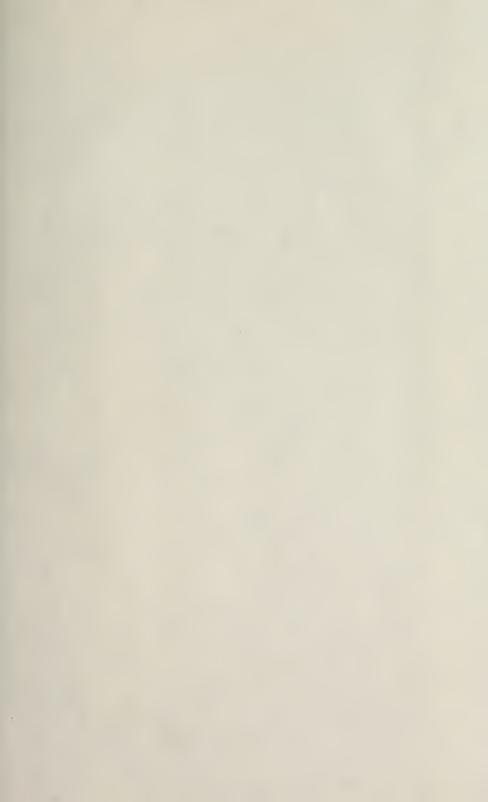

"Castle of St. Angelo," from the class of 1918.

Respectfully submitted,

ALBERT L. BARBOUR.
